Modeling Risk Management in Sustainable Construction Desheng Dash Wu, 2010-11-08 In this edited volume we present the state of the art views of the perspective of enterprise risk management to include frameworks and controls in the ERM process with respect to supply chains constructions and project energy environmental and sustainable development risk management. The bulk of this volume is devoted to presenting a number of modeling approaches that have been or could be applied to enterprise risk management in construction. International Trade and Global Macropolicy Farrokh

Langdana, Peter T. Murphy, 2013-07-16 In the curricula of highly ranked MBA programs two areas of discussion are conspicuously absent: International Trade and Global Macroeconomic Policy. In this post financial crisis environment as the US and other advanced economies continue to experience sluggish growth persistently high unemployment and political agitation for increasingly protectionist policies discussions pertaining to trade currencies and international capital flows are often fraught with emotion tension and hysteria. This book cuts through the emotions and superficial solutions and provides the reader with a thorough understanding of the hard hitting theoretical models that drive the global flow of goods services and capital in the real world. A key feature of this volume is the presentation of the theoretical models and the discussion of their implications in the context of real world applications. This text is uniquely designed for current and future business leaders who are or will be engaged in the global economy. Armed with an understanding of the theoretical underpinnings driving goods capital and ideas across national boundaries readers will learn to anticipate the effects of trade and macroeconomic policy changes and will have the tools to make sound informed decisions for themselves and their global organizations. **Development and Deprivation in the Indian Sub-continent** Utpal De, Manoranjan Pal, 2019-06-14 The
