Macrohistory Essays In The Sociology Of The Long Run:

Macrohistory Randall Collins, 1999 Explores the accomplishments of the golden age of macrohistory the sociologically informed analysis of long term patterns of political economic and social change The topics range from the Marxian inspired theory of revolutions to the roots of the Holocaust *The Institutional Dynamics of Culture, Volumes I and II* Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory's influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences *Hannah Arendt, Totalitarianism, and the Social Sciences* Peter Baehr, 2010-03-11 This book examines the nature of totalitarianism as interpreted by some of the finest minds of the twentieth century It focuses on Hannah Arendt's claim that totalitarianism was an entirely unprecedented regime and that the social sciences had integrally misconstrued it A sociologist who is a critical admirer of Arendt Baehr looks sympathetically at Arendt's objections to social science and shows that her complaints were in many respects justified Avoiding broad disciplinary endorsements or dismissals Baehr reconstructs the theoretical and political stakes of Arendt's encounters with prominent social scientists such as David Riesman Raymond Aron and Jules Monnerot In presenting the first systematic appraisal of Arendt's critique of the social sciences Baehr examines what it means to see an event as unprecedented Furthermore he adapts Arendt and Aron's philosophies to shed light on modern Islamist terrorism and to ask whether it should be categorized alongside Stalinism and National Socialism as totalitarian

Max Weber Alan Sica, 2017-09-08 The most profound and enduring social theorist of sociology's classical period Max Weber speaks as cogently to concerns of the new century as he did to those of the past In *Max Weber and the New Century* Alan Sica demonstrated Weber's preeminent position and lasting vitality within social theory by applying his ideas to a broad range of topics of contemporary concern *Max Weber A Comprehensive Bibliography* is a companion volume that offers some 4 600 bibliographic listings of work on Weber making it the most complete guide to the literature in English and a testament to the continued vitality of Weber's thought Sica's work supersedes all previous bibliographical efforts covering the Weber literature both in the quantity and accuracy of its references and the clarity and convenience of its format In order to demonstrate the enormous variety of Weberiana in English Sica has adopted a liberal criterion for inclusion rather than a critical one choosing to mix the best with what may be more routine work Following a preface in which previous bibliographies and bibliographic problems are discussed the volume opens with a series of five specialized bibliographies The

first lists Weber's works in English translation The second lists reviews of Weber's major works including those translated into English while the third covers reviews of recent books and other work on Weber The fourth section contains a selection of dissertations and theses relating to Weber or his ideas The fifth includes primary and secondary sources treating Weber on rationality and rationalization processes The last and largest section offers a comprehensive Weber bibliography of works in English This large scale endeavor attempts to identify with accuracy and completeness the entire universe of Weber scholarship in English It will be an essential scholarly tool for sociologists historians economists and students of cultural and intellectual history

Methods in World History Janken Myrdal, Arne Jarrick, Maria Wallenberg Bondesson, 2016-05-02 *Methods in World History* is the first international volume that systematically addresses a number of methodological problems specific to the field of world history Prompted by a lack of applicable works the authors advocate a considerable sharpening of the tools used within the field of study Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions and of propping up other more ideological constructions The dedicated critical approach outlined in this volume helps to mitigate such risks Each author addresses a particular issue of method for source criticism archaeological evidence or estimates of economies for example discussing the problems giving practical examples and offering solutions and ways of overcoming the difficulties involved The perspectives are varied the criticism focussed and a common theme of coalescence is maintained throughout This unique anthology will be of great use to advanced scholars of world history and to students entering the field for the first time
