Bryen, 2012-12-06 This study could not have been written before Professor Karl Deutsch made his great contribution to political science in his book The Nerves of Government In applying the concepts elaborated in that work to the study of international politics it has been necessary to interpret and occasionally add to the concepts developed by Professor Deutsch I do not know whether Deutsch would accept these changes modifications and interpretations Here I can only say that I have attempted to stay in the same spirit that I think motivated Professor Deutsch's pioneering study That spirit is expressed throughout his work It is that all studies of politics and all techniques and models suggested as instrument of political analysis have this purpose that men should be more able to act in politics with their eyes open In completing this work lowe much to many Mrs Susan Schellenberg aided me in identifying sections of an earlier draft that were unclear and helped me test some of the ideas I added to Deutsch's work Mr Frederick Slutsky did some preliminary testing of the action system

formulations employed in the third chapter by using quantitative methods Particular gratitude is due to the committee who saw this manuscript as a dissertation at Tulane University This committee led by Professor Henry L Mason consisted of Professor Warren Roberts Jr Professor James D Cochrane Professor Jean M Danielson and Professor John S Gillespie

Turbulence in World Politics James N. Rosenau, 2018-06-05 In this ambitious work a leading scholar undertakes a full scale reconceptualization of international relations Turbulence in World Politics is an entirely new formulation that accounts for the persistent turmoil of today's world even as it also probes the impact of the microelectronic revolution the postindustrial order and the many other fundamental political economic and social changes under way since World War II To develop this formulation James N Rosenau digs deep into the workings of communities and the orientations of individuals that culminate in collective action on the world stage His concern is less with questions of epistemology and methodology and more with the development of a comprehensive theory one that is different from other paradigms in the field by virtue of its focus on the tumult in contemporary international relations The book depicts a bifurcation of global politics in which an autonomous multi centric world has emerged as a competitor of the long established state centric world A central theme is that the analytic skills of people everywhere are expanding and thereby altering the context in which international processes unfold Rosenau shows how the macro structures of global politics have undergone transformations linked to those at the micro level long standing structures of authority weaken collectivities fragment subgroups become more powerful at the expense of states and governments national loyalties are redirected and new issues crowd onto the global agenda These turbulent dynamics foster the simultaneous centralizing and decentralizing tendencies that are now bifurcating global structures

Transcending Postmodernism M. Kaplan, I. Hamati-Ataya, 2013-11-26 Contemporary philosophy is torn between a reliance on the pragmatic meanings of designated objects and a foundation based on formal theory This book shows that philosophical knowledge which no more has a terminal state than an infinite set has a last term advances when the dialectical relationship between the two approaches is synthesized The choice of designations is intimately related to theory and the form of theory is intimately related to the character of designated objects The intimate dialectical relationship between theory and meaning is explored in detail in the area of international theory The recent emphasis on realism rests on a regressive misunderstanding of the dialectical relationship between theory and practice that loses Newton's acute understanding of it an understanding that underlies the great advances of physics and that is lost in the contemporary social sciences

Political Realism, Freud, and Human Nature in International Relations R. Schuett, 2010-05-24 This book provides an important reappraisal of the concept of human nature in contemporary realist international political theory Developing a Freudian philosophical anthropology for political realism he argues for the careful resurrection of the concept of human nature in the wider study of international relations

Theory of International Politics Kenneth N. Waltz, 2010-01-26 From Theory of International Politics National politics is the realm of authority of administration and of law International

politics is the realm of power of struggle and of accommodation States like people are insecure in proportion to the extent of their freedom If freedom is wanted insecurity must be accepted Organizations that establish relations of authority and control may increase security as they decrease freedom If might does not make right whether among people or states then some institution or agency has intervened to lift them out of nature's realm The more influential the agency the stronger the desire to control it becomes In contrast units in an anarchic order act for their own sakes and not for the sake of preserving an organization and furthering their fortunes within it Force is used for one's own interest In the absence of organization people or states are free to leave one another alone Even when they do not do so they are better able in the absence of the politics of the organization to concentrate on the politics of the problem and to aim for a minimum agreement that will permit their separate existence rather than a maximum agreement for the sake of maintaining unity If might decides then bloody struggles over right can more easily be avoided
