Mad Science In Imperial City:

Mad Science in Imperial City Shanxing Wang, 2005 Poetry Prose Asian American Studies MAD SCIENCE IN IMPERIAL CITY is propelled by the personal loss and trauma Shanxing Wang experienced during the political turbulence of the 1980s which culminated in the 1989 tragedy at Tiananmen Square From this personal experience Wang has created a work of art in language which breaks new territories of poetic form The central urgency of Wang's work is a fractured personal and ideological loss mirroring this the work manufactures its own form on the page as a broken narrative Like Dictée by Theresa Hak Kyung Cha Wang's work materializes the shattered effects of cultural history on the mind of the poet who is trying to piece his life together in its devastating and unresolved wake Kristin Prevallet *The Limits of Fabrication* Nathan Brown, 2017-01-02 Poetry or poesis has long been understood as a practice of making But how are experiments in the making of poetic forms related to formal making in science and engineering The Limits of Fabrication takes up this question in the context of recent developments in nanoscale materials science investigating concepts and ideologies of form at stake in new approaches to material construction Tracing the direct pertinence of fields crucial to the new materials science nanotechnology biotechnology crystallography and geodesic design in the work of Shanxing Wang Caroline Bergvall Christian Bök and Ronald Johnson back to the midcentury development of Charles Olson's objectist poetics Nathan Brown carves out a tradition of constructivist nonorganic poetics that has developed in conversation with science and engineering While proposing a new approach to the relation of techné craft skill and poesis making forming this book also intervenes in philosophical debates concerning the concept of the object the distinction between organic and inorganic matter theories of self organization and the relation between design and nature Engaging with Heidegger Agamben Whitehead Stiegler and Nancy Brown shows that materials science and materialist poetics offer crucial resources for thinking through the direction of contemporary materialist philosophy **The Believer**, **The Imaginary Present** Amy Catanzano, 2025 Exploring the questions of the universe through poetry and science Questions of Poetics Barrett Watten, 2016-07-01 Questions of Poetics is Barrett Watten's major reassessment of the political history social formation and literary genealogy of Language writing A key participant in the emergent bicoastal poetic avant garde as poet editor and publisher Watten has developed over three decades of writing in poetics a sustained account of its theory and practice The present volume represents the core of Watten's critical writing and public lecturing since the millennium taking up the historical origins and continuity of Language writing from its beginnings to the present Each chapter is a theoretical inquiry into an aspect of poetics in an expanded sense from the relation of experimental poetry to cultural logics of liberation and political economy to questions of community and the politics of the avant garde to the cultural contexts where it is produced and intervenes Each serves as a kind of thought experiment that theorizes and assesses the consequences of Language writing in expanded fields of meaning that include history political theory art history and narrative theory While all are grounded in a series of baseline questions of

poetics they also polemically address the currently turbulent debates on the politics of the avant garde especially Language writing among emerging communities of poets In manifold ways Watten masterfully demonstrates the aesthetic and political aims of Language writing its influence on emerging literary schools and its present aesthetic critical and political horizons Questions of Poetics will be a major point of reference in continuing debates on poetry and literary history a critical reexamination for already familiar readers and a clearly presented introduction for new ones **The Routledge Handbook of CoFuturisms** Taryne Jade Taylor,Isiah Lavender III,Grace L. speculative critique of Kant will have to re open and consider anew the conflict and complementarity of reason and experience Rationalist Empiricism shows that the capacity of reason and experience to extend and yet delimit each other has always been at the core of philosophy and science Coordinating their discrepant powers Brown argues is what enables speculation to move forward in concert with critique Sweeping across ancient modern and contemporary philosophy as well as political theory science and art Brown engages with such major thinkers as Plato Descartes Hume Hegel Marx Heidegger Bachelard Althusser Badiou and Meillassoux He also shows how the concepts he develops illuminate recent projects in the science of measurement and experimental digital photography With conceptual originality and argumentative precision Rationalist Empiricism reconfigures the history and the future of philosophy politics and aesthetics **Microscopy, Magnification and Modernist Fiction** Patrick Armstrong, 2024-12-26 Exploring how modernism registered shock experiences of the microscopic and extended vision in prose fiction through the work of four modernist writers D H Lawrence Marcel Proust Virginia Woolf and Samuel Beckett this book is the first substantial study of the interrelations between microscopy and modernist fiction Illustrating ways in which optical instruments had the capacity to change displace and reframe ideas of what the world is like this book argues that encounters with the microscopic are often depicted as thresholds between the human and the non human in ways that reverberate through modernist fiction Exploring a period of significant developments in microscopical tools and techniques from the light microscope to the electron microscope this book traces a shift that reconfigured the limits of the observable 365 ,2005
