Sumit Ganguly, Andrew Scobell, Joseph Liow

Madness In The Multitude Human Security And World Disorder:

Madness in the Multitude Fen Osler Hampson, Jean Daudelin, 2002 *Madness in the Multitude* explores the nature of human security in the contemporary world At one level human security is about freedom from fear and alleviating the plight of innocent victims of armed conflict Civil strife in many corners of the globe East Timor Bosnia Kosovo Rwanda Burundi Sudan Georgia Tajikistan have witnessed extraordinary violence directed at civilians especially the most vulnerable citizens in society such as women and children International efforts to curb the production and use of anti personnel landmines half the proliferation and spread of small arms and strengthen international prohibitions against the most egregious violations of human rights through the establishment of an International Criminal Court are directed at augmenting human security But at another level the concept of human security addresses a much wider set of concerns There are those who argue that human security is not just about freedom from fear but also freedom from want and other kinds of deprivation These advocates point to the adverse affects of globalization on human development and the problems of achieving social justice in a world where the forces of globalization have unequal impacts on the distribution of wealth and income According to this view the widening gap between the world s richest and poorest countries is a major cause for concern as are a wide range of nonmilitary threats to human health and survival such as AIDS water and air borne pollutants and the general deterioration of the biosphere In a wide ranging theoretical and empirical analysis *Madness in the Multitude* examines the different meanings and understanding of the concept of human security and how the concept of human security has evolved over the past two centuries Through case studies of the International Criminal Court the Anti personnel Landmines Treaty international efforts to control small arms military intervention in Kosovo and elsewhere and the work of international development agencies and lending institutions this book asks whether there is a new human security paradigm of international politics and what the implications of this paradigm for international order are The volume suggests that human security constitutes a new kind of global public good whose provision challenges our traditional conceptions about the purpose and function of international institutions the role of civil society and the nature of power in international politics This book explores how our conceptions of human security have evolved in the latter half of the twentieth century analyzing the debate about how best to promote and advance human security

Critical Perspectives on Human Security David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security Studies and IR The Human Security paradigm has had considerable significance for academics policy makers and practitioners Under the rubric of Human Security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the Cold War era Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and

shape the space within which security concerns inform international policy practices However in its wider use Human Security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non Western spaces or as legitimizing attacks on Iraq and Afghanistan This book is concerned with critical perspectives towards Human Security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security This book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations

A Decade of Human Security David R. Black, 2016-03-03 Human security has been advanced as an alternative to traditional state based conceptualizations of security yet controversies about the use and abuse of the concept remain Investigating innovations in the advancement of the human security agenda over the past decade this book identifies themes and processes around which consensus for future policy action might be built It considers the ongoing debates regarding the human security agenda explores prospects and projects for the advancement of human security addresses issues of human security as emerging forms of new multilateralisms and examines claims that human security is being undermined by US unilateralisms This comprehensive volume explores the theoretical debate surrounding human security and details the implications for practical application It will prove ideal for students of international relations security studies and development studies

Handbook of Asian Security Studies Sumit Ganguly, Andrew Scobell, Joseph Liow, 2009

State Responses to Human Security Courtney Hillebrecht, Tyler R. White, Patrice C. McMahon, 2013-11-07 The aim of this book is to analyse why and how states respond to human security both at home and abroad Although states still define security as the defense of territory from military attack increasingly security pertains to the protection of human beings from violence This violence can emerge from rebels drug traffickers terrorism and even environmental and demographic changes While previous literature in this field has provided rich empirical detail about human security crises it is generally quiet about how states respond to these crises State Responses to Human Security fills this lacuna by bringing in concepts from international security studies and focusing on states perceptions of power and the changing nature of human security Instead of debating whether or not human security exists the authors in this volume agree that human security has been redefined to include policies associated with violence toward individuals and groups and draw on recent events in the Middle East China and Mexico to understand how and when human security issues prompt state responses and affect international relations The case studies analysed in this book suggest that states respond to human security threats differently but in both the domestic context and abroad power and perceptions matter greatly in shaping states reactions to human security concerns This book

will be of much interest to students of human security foreign policy international relations and security studies in general

Environmental Security Rita Floyd, Richard Matthew, 2013-01-04 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non-existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography

International Organization and Global Governance Thomas G. Weiss, Rorden Wilkinson, 2018-02-16 Completely revised and updated for the second edition this textbook continues to offer the most comprehensive resource available for all interested in international organization and global governance The book offers in depth and accessible coverage of the history and theories of international organization and global governance Discussions of the full range of state intergovernmental and non-state actors Examinations of key issues in all aspects of contemporary world politics New additions to this edition include New and revised chapters on theories of international organization and global governance New substantive chapters on global corporations China financial markets terrorist organizations governing global energy and the Internet Updated contributions to reflect the changing nature of world politics The book comprises fifty-four chapters arranged in seven parts and woven together by a comprehensive introduction to the field along with separate introductions to each part to guide students and faculty and helpful pointers to further reading *International Organization and Global Governance* is a self-contained resource enabling readers to comprehend more fully the role of myriad actors in the governance of global life as well as to assemble the many pieces of the contemporary global governance puzzle

Human Security in East Asia Sorpong Peou, 2008-11-19 Since the end of the Cold War the number of interstate

wars has remained relatively low although whilst states may be more secure than ever this does not mean that individual human beings are too This has led to a growing recognition of the importance of human security in contrast to the traditional realist focus on state security This book explores human security in East Asia focusing in particular on the challenges to collaboration among actors involved in the process of human security promotion It examines the theoretical complexities of conceptual arguments about human security drawing on the ideas of scholars from Asia and the West to provide a global perspective on what causes human insecurity and how security can best be achieved It considers in detail case studies of military interventions in East Asia in particular East Timor and assesses how successful collaborative efforts have been in providing human security It also explores case studies of non military intervention including international criminal justice in Cambodia and East Timor It discusses the relationship of regional great powers such as China and Japan to human security promotion arguing that it will be better served if these powers engage less in the traditional game of geopolitics and if human security objectives do not work against actors interests It shows how interventions to uphold human security have not always succeeded to the extent that was hoped despite the best of intentions and considers how improved collaboration can be achieved so that future interventions enjoy more consistent success

Human Trafficking, Human Security, and the Balkans H. Richard Friman, Simon Reich, 2010-06-15 In the aftermath of four Yugoslav wars ongoing efforts at reconstruction in South Eastern Europe have devoted relatively limited attention to dimensions of human security that enhance protections for the region's most vulnerable populations in their daily lives It is in this context that South Eastern Europe and especially the Western Balkan region has emerged as a nexus point in human trafficking Human Trafficking Human Security and the Balkans brings together leading scholars NGO representatives and government officials to analyze and offer solutions to this challenge The contributors explore the economic dynamics of human trafficking in an era of globalization which has greatly facilitated not only the flow of goods and services but also the trade in human beings They also examine the effectiveness of international and transnational policies and practice the impact of peacekeeping forces and the emergence of national and regional action plans in the Western Balkans and more broadly in South Eastern Europe Finally they consider the nature and ramifications of the gap between human security rhetoric and institutional policy steps against human trafficking

Globalization, Development and Human Security Anthony G. McGrew, Nana K. Poku, 2007-02-12 Whether globalization development and human security are inescapably trapped within a vicious circle or a virtuous circle is the central concern of this book
