Stobie,2023-01-12 Focusing on texts from the late 1970s to the 1990s which document both changing attitudes to terminations of pregnancy and dramatic environmental medical and socio political developments during southern Africa s liberation struggles this book examines how four writers from Botswana South Africa and Zimbabwe address the ethics of abortion and reproductive choice Viewing recent fiction through the lens of new materialist theory which challenges conventional individual based notions of human rights by asserting that all matter holds agency this book argues that southern African women writers anticipate and exceed current feminist revivals of materialist thought Not only do the authors question contemporary discourse framing abortion as either a confirmation of a woman s right to choose or an unethical termination of human life but they challenge conventional understandings of development growth and time Through close readings of both literal gestation in the selected texts and the metaphorical reproduction of the post colonial nation this study advances the concept of reproductive agency creating a range of queer ecocritical alternatives to tropes such as those of the Mother Country Mother Africa or the birth of a nation This study situates abortion narratives by Wilma Stockenström translated by J M Coetzee Zo Wicomb Yvonne Vera and Bessie Head alongside contemporary postcolonial feminist theories melding traditional beliefs with materialist views to reconsider the future of reproductive health matters in southern Africa Merging queer ecocritical perspectives from materialism and

postcolonialism this study will appeal to students and researchers in the medical humanities new materialisms and postcolonial studies **Official Telephone Directory** ,2006 **Directory of Publishing** ,2005 The Bible, the Bullet, and the Ballot Fabulous Moyo,2015-03-05 This book provides a balanced account of the role of Christians Christian organizations and churches in sociopolitical transformation over the bedrock of colonial and nationalist politics in the past century in Zimbabwe The work explores the broader social and political impact of prominent African Christian clergy who were sociopolitical activists such as Ndabaningi Sithole Abel Muzorewa and Canaan Banana It also highlights the role of missionaries who contributed to the African struggle for independence such as Ralph Edward Dodge Donal Lamont and Garfield Todd The work further explores the contributions of African nationalist parties and prominent politicians with Christian roots such as Joshua Nkomo and Robert Mugabe in the struggle for independence and their contribution in the postcolonial era in light of their Christian heritage and the collective pre independence nationalist ideals on nation building and national unity **Soil Organic Matter and Feeding the Future** Rattan Lal,2021-12-08 Soil organic matter SOM is the primary determinant of soil functionality Soil organic carbon SOC accounts for 50% of the SOM content accompanied by nitrogen phosphorus and a range of macro and micro elements As a dynamic component SOM is a source of numerous ecosystem services critical to human well being and nature conservancy Important among these goods and services generated by SOM include moderation of climate as a source or sink of atmospheric CO₂ and other greenhouse gases storage and purification of water a source of energy and habitat for biota macro meso and micro organisms a medium for plant growth cycling of elements N P S etc and generation of net primary productivity NPP The quality and quantity of NPP has direct impacts on the food and nutritional security of the growing and increasingly affluent human population Soils of agroecosystems are depleted of their SOC reserves in comparison with those of natural ecosystems The magnitude of depletion depends on land use and the type and severity of degradation Soils prone to accelerated erosion can be strongly depleted of their SOC reserves especially those in the surface layer Therefore conservation through restorative land use and adoption of recommended management practices to create a positive soil ecosystem carbon budget can increase carbon stock and soil health This volume of Advances in Soil Sciences aims to accomplish the following Present impacts of land use and soil management on SOC dynamics Discuss effects of SOC levels on agronomic productivity and use efficiency of inputs Detail potential of soil management on the rate and cumulative amount of carbon sequestration in relation to land use and soil crop management Deliberate the cause effect relationship between SOC content and provisioning of some ecosystem services Relate soil organic carbon stock to soil properties and processes Establish the relationship between soil organic carbon stock with land and climate Identify controls of making soil organic carbon stock as a source or sink of CO₂ Connect soil organic carbon and carbon sequestration for climate mitigation and adaptation **Great Zimbabwe** Shadreck Chirikure,2020-11-29 Conditioned by local ways of knowing and doing Great Zimbabwe develops a new interpretation of the
