Clinical Ethics Handbook for Nurses Pamela Grace, Aimee Milliken, 2022-05-05 This handbook provides tools for nurse educators ethics educators practicing nurses and allied health professionals for developing confidence and skill in ethical decision making in interdisciplinary settings such as acute and chronic care hospitals and clinics It is useful for all healthcare personnel who face ethical issues in the course of their work and who work with nurses to resolve these issues While the content is based on a US context the concerns of nurses internationally are discussed and emphasized Nurses working in acute and chronic care settings face many obstacles to providing good care and

are often the first line of defense related to patient safety and meeting the needs of patients and their families. Some of the obstacles to optimal patient care are institutional, some sociocultural, and others the result of inadequate communication. Evidence points to the idea that while nurses do have the knowledge and skills to address practice problems of various sorts, they may not be confident in their skills of ethical decision making and advocacy actions. This is a resource to develop moral agency on behalf of individuals and to address broader barriers to good care raised at the local, community, or social levels.

Ray, 2018-05-16. How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision making process. You will learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning, and negotiation tools for interventions. **Bioethics** Helga
