Hooked Michael Moss, 2011-03-02 NEW YORK TIMES BESTSELLER From the author of Salt Sugar Fat comes a gripping The Wall Street Journal exposé of how the processed food industry exploits our evolutionary instincts the emotions we associate with food and legal loopholes in their pursuit of profit over public health The processed food industry has managed to avoid being lumped in with Big Tobacco which is why Michael Moss's new book is so important Charles Duhigg author of The Power of Habit Everyone knows how hard it can be to maintain a healthy diet But what if some of the decisions we make about what to eat are beyond our control Is it possible that food is addictive like drugs or alcohol And to what extent does the food industry know or care about these vulnerabilities In Hooked Pulitzer Prize winning investigative reporter Michael Moss sets out to answer these questions and to find the true peril in our food Moss uses the latest research on addiction to uncover what the scientific and medical communities as well as food manufacturers already know that food in some cases is even more addictive than alcohol cigarettes and drugs Our bodies are hardwired for sweets so food giants have developed fifty six types of sugar to add to their products creating in us the expectation that everything should be cloying we've evolved to prefer fast convenient meals hence our modern day preference for ready to eat foods Moss goes on to show how the processed food industry including major companies like Nestlé Mars and Kellogg's has tried not only to evade this troubling discovery about the addictiveness of food but to actually exploit it For instance in response to recent dieting trends food manufacturers have simply turned junk food into junk diets filling grocery stores with diet foods that are hardly distinguishable from the products that got us into trouble in the first place As obesity rates continue to climb manufacturers are now claiming to add ingredients that can effortlessly cure our compulsive eating habits A gripping account of the legal battles insidious marketing campaigns and cutting edge food science that have brought us to our current public health crisis Hooked lays out all that the food industry is doing to exploit and deepen our addictions and shows us why what we eat has never mattered more

Food and Drug Administration. Program Information and Analysis Group,1991 *Democracy by Disclosure* Mary Graham,2002-08-26 In December 1999 the Institute of Medicine shocked the nation by reporting that as many as 98 000 Americans died each year from mistakes in hospitals twice the number killed in auto accidents Instead of strict rules and harsh penalties to reduce those risks the Institute called for a system of standardized disclosure of medical errors If it worked it would create economic and political pressures for hospitals to improve their practices Since the mid 1980s Congress and state legislatures have approved scores of new disclosure laws to fight racial discrimination reduce corruption and improve services The most ambitious systems aim to reduce risks in everyday life risks from toxic pollution contaminants in drinking water nutrients in packaged foods lead paint workplace hazards and SUV rollovers Unlike traditional government warnings they require corporations and other organizations to produce standardized factual information at regular intervals about risks they create Legislated transparency has become a mainstream instrument of social policy Mary Graham argues that these requirements represent a remarkable policy innovation Enhanced by computers and the Internet they are creating a new techno populism an optimistic conviction that information itself can improve the lives of ordinary citizens and encourage hospitals manufacturers food processors banks airlines and other organizations to further public priorities Drawing on detailed profiles of disclosure systems for toxic releases nutritional labeling and medical errors Graham explains why the move toward greater transparency has flourished during a time of regulatory retrenchment and why corporations have often supported these massive raids on proprietary information However Democracy by Disclosure sounds a cautionary note Just as systems of financial disclosure have come under new scrutiny in the wake of Enron s collapse systems of social disclosure deserve care **Vitamania** Catherine Price,2016-04-12 In Vitamania award winning journalist Catherine Price takes readers on a lively journey through the past present and future of the mysterious micronutrients known as human vitamins an adventure that includes poison squads and political maneuvering irradiated sheep grease and smuggled rats Part history part science part personal exploration Price s witty and engaging book reveals how vitamins have profoundly shaped our attitudes toward eating and investigates the emerging science of how what we eat might affect our offspring for generations to come AMAZON *Collaboration across Health Research and Medical Care* Bart Penders,Niki Vermeulen,John N.
