Food Analysis by HPLC Leo M.L. Nollet, Fidel Toldra, 2012-11-16 For food scientists high performance liquid chromatography HPLC is a powerful tool for product composition testing and assuring product quality Since the last edition of this volume was published great strides have been made in HPLC analysis techniques with particular attention given to miniaturization automatization and green chemistry

Lipid Biochemistry J.L. Harwood, M.I. Gurr, 2013-04-17 Lipids can usually be extracted easily from tissues by making use of their hydrophobic characteristics However such extractions yield a complex mixture of different lipid classes which have to be purified further for quantitative analysis Moreover the crude lipid extract will be contaminated by other hydrophobic molecules e.g. by

intrinsic membrane proteins Of the various types of separation processes thin layer and column chromatography are most useful for intact lipids High performance liquid chromatography HPLC is also rapidly becoming more popular especially for the fractionation of molecular species of a given lipid class The most powerful tool for quantitation of the majority of lipids is gas liquid chromatography GLC The method is very sensitive and if adapted with capillary columns can provide information with regard to such subtle features as the position or configuration of substitutions along acyl chains By coupling GLC or HPLC to a radioactivity detector then the techniques are also very useful for metabolic measurements Although research laboratories use generally sophisticated analytical methods such as GLC to analyse and quantify lipid samples chemical derivatizations are often used in hospitals For these methods the lipid samples are derivatized to yield a product which can be measured simply and accurately usually by colour Thus total triacylglycerol cholesterol or phospholipid phosphorus can be quantitated conveniently without bothering with the extra information of molecular species etc which might be determined by more thorough analyses REFERENCES Christie w w 1982 Lipid Analysis 2nd edn Pergamon Press Oxford

Micronutrients and Fatty Acids in Precision Nutrition Strategies Manja Zec, Cornelius M. Smuts, Lizelle Zandberg, Irena Krga, 2022-01-28 Fish Nutrition Ronald W.
