Kahn, Jr.,2011-02-25 Why it matters that our relationship with nature is increasingly mediated and augmented by technology Our forebears may have had a close connection with the natural world but increasingly we experience technological nature Children come of age watching digital nature programs on television They inhabit virtual lands in digital games And they play with robotic animals purchased at big box stores Until a few years ago hunters could telehunt shoot and kill animals in Texas from a computer anywhere in the world via a Web interface Does it matter that much of our experience with nature is

mediated and augmented by technology In *Technological Nature* Peter Kahn argues that it does and shows how it affects our well being Kahn describes his investigations of children s and adults experiences of cutting edge technological nature He and his team installed technological nature windows 50 inch plasma screens showing high definition broadcasts of real time local nature views in inside offices on his university campus and assessed the physiological and psychological effects on viewers He studied children s and adults relationships with the robotic dog AIBO including possible benefits for children with autism And he studied online telegardening a pastoral alternative to telehunting Kahn s studies show that in terms of human well being technological nature is better than no nature but not as good as actual nature We should develop and use technological nature as a bonus on life not as its substitute and re envision what is beautiful and fulfilling and often wild in essence in our relationship with the natural world
