The Royal Air Force M. J. Armitage, 1993 **The Royal Air Force** M. J. Armitage, 1998 *Royal Air Force* Continuum International Publishing Group, Limited, 1999-05 **The Official Illustrated History of RAF Search and Rescue** Paul E Eden, 2020-07-09

In February 2016 the RAF's Search and Rescue Force SARF celebrated its 75th anniversary. In June that year the world renowned and universally admired service was officially disbanded despite attempts from many including HRH Prince William to save it as part of the RAF. This book is an official fully illustrated in depth account of the SARF's rich and glorious history from its origins in World War II through to its recent withdrawal. The book contains a foreword by HRH Prince William himself plus action packed and awe inspiring photographs from the RAF's archive of photographs and exclusive interviews with former crewmembers telling their own dramatic stories of derring do. Officially endorsed by the RAF. An Illustrated History of the RAF Search and Rescue Force is the first and probably the only major book of its kind written on this subject. It is an essential purchase for anyone with an interest in military history, British history, the Royal Family and those who love stories of extreme and daring rescue missions.

The Royal Air Force: The Trenchard Years, 1918-1929 Ian M. Philpott, 2005-07-19

The inter war years between 1918 and 1939 saw the newly created Royal Air Force fighting for its very existence, politically being dispatched to the remotest corners of the British Empire and its Protectorates in various policing roles and then finally engaged in a headlong rush to modernize in the face of the new German Fascist regime that was threatening British and European freedom. Yet this important period in RAF history and its effect on political and military rationale during the period has never been completely documented. This exhaustive and comprehensive reference is the most detailed work to be published on the subject. The author gives full information on the changing structure of the Force during the period, squadron operations, political machinations and their effects, the airplanes and their equipment, the personnel, technical advances in navigation and breakthroughs achieved in engine performance. The book is cross referenced throughout, extremely well illustrated and contains an abundance of location maps and other diagrams. This book will become a Bible for anyone interested in the history of the RAF. This work has been reviewed by personnel at the RAF Historical Branch who praise it.

The Territorial Air Force Frances Louise Wilkinson, 2020-11-23

What is almost certainly the definitive account of the Auxiliary Air Force, the Special Reserve and the Royal Air Force Volunteer Reserve. Paul Nixon, Army Ancestry Research. To date little has been written about the Territorial Air Force as a voluntary military organization and no sustained analysis of its recruitment and social composition undertaken. Made up of three different parts, the Auxiliary Air Force, the Special Reserve and the Royal Air Force Volunteer Reserve, these three separate and different groups have not featured significantly in existing literature. Along with a history of the Territorial Air Force, this book includes an analysis of how the volunteers joined and what kinds of men were accepted into the organizations as both pilots and officers. The influences class and social status had on recruitment in the run up to the Second World War are also discussed.

There is an exploration of the key differences between the Auxiliary squadrons and the SR squadrons as well as the main reasons for the idea of merging the SR squadrons into the AAF squadrons Briefly discussed are the newly formed University Air Squadrons that were set up to promote air mindedness and to stimulate an interest and research on matters aeronautical Military voluntarism continued to play a key role in the defense of twentieth century Britain and class ceased to be the key determining factor in the recruitment of officers as the organizations faced new challenges Within both the AAF and the RAFVR the pre war impression of a gentlemen s flying club finally gave way to a more meritocratic culture in the post war world

Powell,2016-09-10 This book explores the development of tactical air power in Britain between 1940 and 1943 through a study of the Royal Air Force's Army Co-operation Command. It charts the work done by the Command during its existence and highlights the arguments between the RAF and Army on this contentious issue in Britain. Much is known about the RAF both in the years preceding and during the Second World War, particularly the exploits of Fighter Bomber and Coastal Commands, yet the existence of the RAF's Army Co-operation Command is little known. Through extensive archival research, Matthew Powell maps the creation and work of the RAF's Army Co-operation Command through an analysis of tactical air power developments during the First World War and inter-war periods, highlighting the debates and arguments that took place between the Air Ministry and the War Office.

The History of Air Intercept Radar & the British Nightfighter 1935-1959 Ian White,2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII. In the years after World War I, the United Kingdom was desperate to develop some form of protection from an enemy air strike. As early as 1923, the British Army had devised sound mirrors that could detect aircraft up to twelve miles away. This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air-to-air radar systems and their uses in battle. Historian Ian White sets this fascinating narrative within the larger political, military, economic and technological context of the era. Through World War II, Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself. But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment, particularly members of the Establishment's Airborne Group working under Dr Edward Bowen. Their Airborne Interception radars, such as the AI Mk IV, were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids. This in-depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment, the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito. It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War.
