Loraison Contemplative:

Thought and Poetic Structure in San Juan de la Cruz's Symbol of Night N. Grace Aaron, 2005 Thought and Poetic Structure in San Juan de la Cruz's Symbol of Night is a comprehensive appraisal of the traditional critical perspectives of mysticism philosophical theological literary and psychological Examining the a priori limitations of these approaches the book presents an original definition of the symbol as an integral whole of experience and expression and concludes that night is the form the organizing principle of spiritual life

Yoga, Meditation, and Mysticism Kenneth Rose, 2016-09-08

Contemplative experience is central to Hindu yoga traditions Buddhist meditation practices and Catholic mystical theology and despite doctrinal differences it expresses itself in suggestively similar meditative landmarks in each of these three meditative systems In Yoga Meditation and Mysticism Kenneth Rose shifts the dominant focus of contemporary religious studies away from tradition specific studies of individual religious traditions communities and practices to examine the contemplative universals that arise globally in meditative experience Through a comparative exploration of the itineraries detailed in the contemplative manuals of Theravada Buddhism Patanjali Yoga and Catholic mystical theology Rose identifies in each tradition a moment of sharply focused awareness that marks the threshold between immersion in mundane consciousness and contemplative insight As concentration deepens the meditator steps through this threshold onto a globally shared contemplative itinerary which leads through a series of virtually identical stages to mental stillness and insight Rose argues that these contemplative universals familiar to experienced contemplatives in multiple traditions point to a common spiritual mental and biological heritage Pioneering the exploration of contemplative practice and experience with a comparative perspective that ranges over multiple religious traditions religious studies philosophy neuroscience and the cognitive science of religion this book is a landmark contribution to the fields of contemplative practice and religious studies
