Making Mountains:

Making Mountains David Stradling, 2009-11-23 For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City In *Making Mountains* David Stradling shows the transformation of the Catskills landscape as a collaborative process one in which local and urban hands capital and ideas have come together to reshape the mountains and the communities therein This collaboration has had environmental economic and cultural consequences Early on the Catskills were an important source of natural resources Later when New York City needed to expand its water supply engineers helped direct the city toward the Catskills claiming that the mountains offered the purest and most cost effective waters By the 1960s New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water The Catskills also served as a critical space in which the nation's ideas about nature evolved Stradling describes the great influence writers and artists had upon urban residents especially the painters of the Hudson River School whose ideal landscapes created expectations about how rural America should appear By the mid 1800s urban residents had turned the Catskills into an important vacation ground and by the late 1800s the Catskills had become one of the premiere resort regions in the nation In the mid twentieth century the older Catskill resort region was in steep decline but the Jewish Borscht Belt in the southern Catskills was thriving The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape Throughout each of these significant incarnations urban and rural residents worked in a rough collaboration though not without conflict to reshape the mountains and American ideas about rural landscapes and nature

The Origin of Mountains Cliff Ollier, Colin Pain, 2004-08-02 *The Origins of Mountains* approaches mountains from facts about mountain landscapes rather than theory The book illustrates that almost everywhere mountains arose by vertical uplift of a former plain and by a mixture of cracking and warping by earth movements and erosion by rivers and glaciers the present mountainous landscapes were created It also gives evidence that this uplift only occurred in the last few million years a time scale which does not fit the plate tectonics theory Another fascinating part of the evidence shows that mountain uplift correlates very well with climatic change Mountain building could have been responsible for the onset of the ice age It certainly resulted in the creation of new environments Fossil plants and animals are used in places to work out the time of mountain uplift which in turn helps to explain biogeographical distributions

[Teachings of Jesus in the Gospel of Thomas](#) Lewis Keizer, 2010-12-22. The Gospel of Thomas preserves a core of authentic Aramaic sayings of Yeshua, older than the earliest Christian writings. When they are isolated from the second-century Gnostic framework, they reveal many of Yeshua's inner-circle kabbalistic teachings. Scholars can restore much of the pre-kabbalistic tradition of Yeshua's era through sources like the *Sepher Yetzirah*, *Sepher Ha Razim*, and the *haggadah* preserved in the Mishna, Babylonian and Palestinian Talmuds, Philo of Alexandria, and the Apocrypha and Pseudepigrapha of the Old Testament. These were the Holy Scriptures of the Essenes, Zadokites, and other messianic Jews of the period, including Yeshua and his disciples. The Psalms they chanted in worship and Shabbat Seder were not just those of our Old Testament but the messianic Odes of Solomon and others preserved in Enochian and apocalyptic scripture. A study of this forgotten sacred literature allows modern scholars to understand and reconstruct the oral Kabbalah of Yeshua embedded in the Gospel of Thomas.

Part graphic novel, part fun guidebook, this very cool rocky journey introduces both eager and reluctant readers to the basic geologic processes that shape our Earth. Clear and concise explanations of the various geologic processes reveal the comprehensive science behind each fascinating topic. Fun facts and simple DIY experiments reinforce the concepts, while short biographies of important scientists inspire future geoscientists. [Nine Critical Mistakes Most Couples Make](#) David Hawkins, 2005-08-15. Drawing from many years of experience as a licensed clinical psychologist, Dr. David Hawkins shows that complex relational problems usually spring from nine destructive habits couples fall into, and he offers practical suggestions for changing the way husbands and wives relate to each other.
