Towards the Abolition of Whiteness David R. Roediger,1994-03-17 Counting the costs of whiteness in the American past and present Mexican muralist, international Marxist Curtis Swope,2024-10-29 David Alfaro Siqueiros was perhaps the most important communist painter of the twentieth century This book the first sustained engagement with Siqueiros s work in the English language focuses on the artist s late murals which are both aesthetically innovative and politically provocative It places Siqueiros in an international context revealing that the dogmatism he has been charged with was in reality a complex phenomenon It provided a foundation for rather than an obstacle to his efforts to create an art embedded in the day to day concerns and theoretical debates of the world wide mass movement he saw himself as a part of South Africa in World History Iris Berger,2009-03-27 This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa Stone Age foragers farmers with iron technology and pastoralists all interacted to create a complex society before Europeans arrived In the seventeenth century Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa British conquest in the early nineteenth century brought an end to slavery as well as new forms of colonial domination tension between the British and the original Dutch settlers armed struggle between expanding European communities and Africans including the highly militarized Zulu kingdom and intensive missionary activity that transformed many African societies The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor new clashes between British and Africaaners the final conquest of African societies and new European migrants During the twentieth century despite further economic development African communities were increasingly impoverished New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African

and African nationalists The intensification of resistance in the 1970s and 80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid's economic and political legacy by building a new nonracial society The book emphasizes social and cultural history focusing on people's interactions and identities according to race class gender religion and ethnicity It also addresses changes in literature both oral and written music and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes While this emphasis reflects dominant trends in historical scholarship for the past two decades it also includes recent material on environmental history and relationships between African Americans and South Africans Where relevant it highlights comparisons between South African and U S history

Zionism and its Discontents Ran Greenstein, 2014-10-20 Mainstream nationalist narratives and political movements have dominated the Israeli Palestinian situation for too long In this much needed book Ran Greenstein challenges this hegemony by focusing on four different but at the same time connected attempts which stood up to Zionist dominance and the settlement project before and after 1948 Greenstein begins by addressing the role of the Palestinian Communist

Party and then the bi nationalist movement before moving on to the period after 1948 when Palestinian attempts to challenge their unjust conditions of marginalisation became more frequent Finally he confronts the radical anti Zionist Matzpen group which operated from the early 1960s 80s In addition to analyses of the shifting positions of these movements Greenstein examines perspectives regarding a set of conceptual issues colonialism and settlement race ethnicity and class and questions of identity rights and power and how such as in the case of South Africa these relations should be seen as global

Decolonizing Knowledge Radha D'Souza, Sunera Thobani, 2025-04-24 Interdisciplinary scholars rethink strategies for moving contemporary decolonization politics forward by revisiting the writings of the mid 20th century anti colonial movements leading intellectuals *Decolonizing Knowledge* draws on intellectual histories of anti colonial thinkers who developed their ideas of decolonization through practical engagement with struggles for freedom from colonialism Reading works by J P S Uberoi Frantz Fanon Aim C saire C L R James and Andaiye among others interdisciplinary activist scholars reflect on the meaning of decolonization that emerged from anti colonial struggles of the past and its relevance today Each chapter in the volume reflects on one or more texts from anti colonial thinkers of the past to draw out the meaning of decolonization as conceptualized by earlier generations providing key insights from their thinking and examining their relevance for contemporary struggles for racial gender and class justice With authors writing from multiple disciplines these essays straddle a range of themes from theory and practice art and literature gender and violence and political economy to address a subject that is preoccupying academia and activists in the 21st century *Decolonizing Knowledge* is an intervention into contemporary debates on decolonizing curricula and universities arguing that these calls need to be firmly engaged in wider social practices for justice and that they can learn much from those who wrote on the topic amid the 20th century s many struggles for freedom

The Full Employment Horizon in 20th-Century America Michael Dennis, 2021-02-11 Through moments of social protest policy debate and popular mobilization this book follows the campaign for economic democracy and the fight for full employment in the United States Starting in the 1930s Dennis explores its intellectual and philosophical underpinnings the class struggle that determined the fate of legislation and the role of left wing civil rights activists in its revival Demonstrating how the campaign for full employment intersected with movements for women s liberation and civil rights it explores how social groups and oppressed minorities interpreted and appropriated the promise of full employment For many full employment provided an indispensable path to racial and gender emancipation In this book Dennis uncovers the class dimensions and the resistance to full employment in the US He demonstrates how the recurring debates over full employment consistently exposed the contradictions inherent in a capitalist society and challenged the assertion that an allegedly free enterprise system automatically generated employment for all

Rethinking Racial Uplift Nigel I. Malcolm, 2022-12-28 2023 CHOICE Outstanding Academic Title In 1903 W E B Du Bois wrote about the Talented Tenth in an influential essay of the same name The concept exalted college educated Blacks who Du Bois believed could

provide the race with the guidance it needed to surmount slavery segregation and oppression in America Although Du Bois eventually reassessed this idea the rhetoric of the Talented Tenth resonated still holding sway over a hundred years later In *Rethinking Racial Uplift Rhetorics of Black Unity and Disunity in the Obama Era* author Nigel I Malcolm asserts that in the post civil rights era racial uplift has been redefined not as Black public intellectuals lifting the masses but as individuals securing advantage for themselves and their children Malcolm examines six best selling books published during Obama s presidency including Randall Kennedy s *Sellout* Bill Cosby s and Alvin Poussaint s *Come On People* and Ta Nehisi Coates s *Between the World and Me* and critically analyzes their rhetorics on Black unity disunity and the so called postracial era Based on these writings and the work of political and social scientists Malcolm shows that a large often ignored percentage of Blacks no longer see their fate as connected with that of other African Americans While many Black intellectuals and activists seek to provide a justification for Black solidarity not all agree In *Rethinking Racial Uplift* Malcolm takes contemporary Black public intellectual discourse seriously and shows that disunity among Blacks a previously ignored topic is worth exploring

The Era Was Lost Glenn Dyer,2024-10-25 An exciting yet relatively unknown episode in American labor history took place in New York City between 1965 and 1975 Rank and file members of numerous unions caught a strike fever as they challenged the entrenched power of some of the country s most powerful politicians employers and union leaders in a wave of contract rejections wildcat strikes and electoral campaigns Workers in unions across New York wanted more than better contracts they contested control of the work process racism on the job and workers place in America s socioeconomic hierarchy while implicitly and explicitly demanding greater democratic control of their representative organizations Some initial challenges were effective and succeeded in delivering better contracts and unseating undemocratic leaders However those early successes were short lived Glenn Dyer traces the way workers were met with employer recalcitrance and union attacks that proved too powerful to organize against In the face of

this resistance workers retreated into a survivalist attitude of accommodation and resignation contributing to the decline of social democratic New York and working class power in the city Ultimately Dyer argues the failures of the rank and file organizing efforts in New York City which was the biggest center of organized labor in the country shows how stunted workers aspirations and numerous defeats not only uprooted the foundations of New York s uniquely social democratic polity but also ushered in a national era of increased working class subservience that has resonance today
