Naked Anthropologist Tales From Around The World:

The Naked Anthropologist Philip R. DeVita, 1992 **Ways of Knowing** Jean-Guy A. Goulet, 1998 The creative world of a northern Native community is revealed in this innovative book. Once semi-nomadic hunters and gatherers, the Dene Tha of northern Canada today live in government-built homes in the settlement of Chateh. Their lives are a distinct blend of old and new in which more traditional forms of social control, healing, and praying intertwine with services supplied by the Royal Canadian Mounted Police, a nursing station, and a Roman Catholic church. Many older cultural beliefs and practices remain, ghosts still linger, reincarnating, and sometimes stealing children's souls. Dreams and visions are powerful shapers of actions and personal visions and experiences are considered the sources of true knowledge.

Changing Fields of Anthropology Michael Kearney, 2004-06-10 This book explores major shifts and reorientations in the recent history of American Anthropology, reflecting the author's vision of what anthropology is and what it has the potential to become. The title phrase "changing fields" can be read in two ways. One meaning refers to how, since the mid-1960s, the larger national and global social, intellectual, and political fields within which American anthropology is situated have profoundly changed. The second meaning refers to how, in response to these changing fields, the author like many other anthropologists changed the locations of his fieldwork along with his research problems and theoretical perspectives. The book engages three fundamental intellectual, political, and methodological challenges that American anthropology is destined to confront or, at its peril, avoid becoming more self-reflexive: achieving theoretical and methodological holism and defense of universal human rights.

An Ethic for the Age of Space Lawrence LeShan, 1996-04-01 Making use of an ethical system based on psychological need rather than on metaphysical or theological grounds, LeShan shows how an evolved ethical system can keep pace with science and technology and displace the damage being done to the planet and our own survival.

Fools and Jesters in Literature, Art, and History Vicki K. Janik, 1998-05-21 Jesters and fools have existed as important and consistent figures in nearly all cultures. Sometimes referred to as clowns, they are typological characters who have conventional roles in the arts, often using nonsense to subvert existing order. But fools are also a part of social and religious history, and they frequently play key roles in the rituals that support and shape a society's system of beliefs. This reference book includes alphabetically arranged entries for approximately 60 fools and jesters from a wide range of cultures. Included are entries for performers from American popular culture such as Woody Allen, Mae West, Charlie Chaplin, and the Marx Brothers; literary characters such as Shakespeare's Falstaff, Rabelais's Gargantua and Pantagruel, and Singer's Gimpel; and cultural and mythological figures such as India's Birbal, the American circus clown, the Native American Coyote, Taishu Engeki of Japan, Hephaestus, Loki, the Norse fool, schlimiels, and schlimazels, and the drag queen. The entries, written by expert contributors, are critical as well as informative. Each begins with a biographical, artistic, religious, or historical background section which places the subject within a larger cultural and historical context. A description and analysis follow. This section may include a discussion of the fool's appearance, gender, role, ethical

and moral roles social function and relationship to such themes as nature time and mortality The entry then discusses the critical reception of the subject and concludes with an extensive bibliography of general works

Strangers to Relatives Sergei Kan, 2001-01-01 Strangers to Relatives is an intimate and illuminating look at a typical but misunderstood part of anthropological fieldwork in North America the adoption and naming of anthropologists by Native families and communities Adoption and naming have long been a common way for Native peoples in Canada and the United States to deal with strangers who are not enemies For over a century adoption and naming have also served as an important means for many Native American and First Nation communities to become connected to the anthropologists visiting and writing about them In this outstanding volume leading anthropologists in the United States and Canada discuss this issue by focusing on the cases of such prominent earlier scholars as Lewis Henry Morgan and Franz Boas They also share personal experiences of adoption and naming and offer a range of stimulating perspectives on the significance of these practices in the past and today The contributors explore the impact of adoption and naming upon the relationship between scholar and Native community considering in particular two key issues How does adoption affect the fieldwork and subsequent interpretations by anthropologists and in turn how are Native individuals and communities themselves affected by adopting an outside scholar whose aim is to learn and write about them Strangers to Relatives not only sheds valuable light on how anthropology fieldwork is conducted but also makes a seminal contribution to our understanding of the ongoing often troubled relationship between the academy and Native communities

Gypsy Economy Micol Brazzabeni, Manuela Ivone Cunha, Martin Fotta, 2015-11-01 Economic arrangements of Romanies are complexly related to their social position The authors of this volume explore these complexities including how economic exchanges forge key social relationships of gender and ethnicity how economic opportunities are constructed and seized and how economic success and failure are transformed into attributes of social persons They explore how despite or perhaps because of their unstable and ambiguous position within the market economy shared today with a growing number of people facing precarity and informalisation Roma and Gypsy communities continuously re create more or less viable economic strategies The ethnographically based chapters share accounts of socially and economically vulnerable populations that face their situation with self determination and creativity

Gypsies in Madrid Paloma Gay y Blasco, 2020-05-26 Throughout the twentieth century Spanish people have deployed conflicting sexual moralities in their struggle for political supremacy within the state The Spanish Gypsies or Gitanos who live at the very bottom of the Spanish socio economic scale have appropriated this concern with gender morality and in the process have reinvented themselves as the only honourable Spaniards Although the

Gitano gender ideology has a distinctively Spanish flavour it revolves around a conceptualization of the female body that is radically different from that of other Spaniards The subtle exploration of these acts of cultural invention is one of the original features of this important new ethnography Another even more striking aspect of the work is the author's vision of the impermanent nature of the Gitano social order and the absence of any representation of community or society Unlike their non Gypsy neighbours Gitanos do not use concepts of tradition territory or social harmony as bases for their singularity Instead they focus on the evaluation of personal moral performances in the present In a cultural universe where all activities are markers of shared identity and where personhood is always sexed men and women continually enact the superiority of Gypsies over non Gypsies Through dress manner and the management of emotions or at wedding rituals where the virginity of young brides is put to the test the body works as the site of these processes

Cason, 1997 Scholars and students engaged in overseas research projects often spend much of their time worrying about mundane details never reported in published research In fact the quality of scholarship often depends on the researcher's ability to navigate a bewildering array of social financial bureaucratic and logistical obstacles encountered in preparing for

Blackened Out Signithia Fordham, 1996-03-13 This innovative portrait of student life in an urban high school focuses on the academic success of African American students exploring the symbolic role of academic achievement within the Black community and investigating the price students pay for attaining it Signithia Fordham s richly detailed ethnography reveals a deeply rooted cultural system that favors egalitarianism and group cohesion over the individualistic competitive demands of academic success and sheds new light on the sources of academic performance She also details the ways in which the achievements of successful African Americans are blacked out of the public imagination and negative images are reflected onto black adolescents A self proclaimed native anthropologist she chronicles the struggle of African American students to construct an identity suitable to themselves their peers and their families within an arena of colliding ideals This long overdue contribution is of crucial importance to educators policymakers and ethnographers

Reconciling and Rehumanizing Indigenous-Settler Relations , Nadia Ferrara, 2015-02-12 Reconciling and Rehumanizing Indigenous

Settler Relations An Applied Anthropological Perspective presents a unique and honest account of an applied anthropologist's experience in working with Indigenous peoples of Canada. It illustrates Dr. Nadia Ferrara's efforts in reconciliation and rehumanization, showing that it is all about recognizing our shared humanity. In this self-reflective narrative, the author describes her personal experience of marginalization and how it contributed to a more in-depth understanding of how others are marginalized, as well as the fundamental sense of belongingness and connectedness. The book is enriched with stories and insights from her fieldwork as a clinician, a university professor, and a bureaucrat. Dr. Ferrara shows how she has applied her experience as an art therapist in Indigenous communities to her current work in policy development to ensure the policies created reflect their current realities. Reconciling and Rehumanizing Indigenous Settler Relations describes the cultural competency course for public servants Dr. Ferrara is leading as a means to break down stereotypes and showcase the resilience of Indigenous peoples. She makes a compassionate and urgent call to all North Americans to connect with their responsibility and compassion and acknowledge the injustices that the original peoples of this land have faced and continue to face. Reconciliation requires concrete action and it starts with the individual's self-reflection, engagement in authentic human-to-human dialogue, learning from one another, and working together towards a better future, all of which is chronicled in this insightful book.
