Formation and Evolution of Low Mass Stars A.K. Ferreira Gullar heralded in Theory of the Nonobject in 1959 with specific attention to a group of major art figures including Lygia Clark, Helio Oiticica and Gego whose work proposed engaged forms of spectatorship that dismissed medium based understandings of art. Exploring the philosophical, economic and political underpinnings of geometric abstraction in post World War II South America, Amor highlights the overlapping inquiries of artists and critics who working on the periphery of European and US modernism contributed to a sophisticated conversation about the nature of the art object. Provided by publisher [The Poetics of Reverie](#) Gaston Bachelard, 1971-06-01. In this his last significant work, an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world, positing the notion of reverie as its most dynamic point of reference. In his earlier book *The Poetics of Space*, Bachelard considered several kinds of praiseworthy space conducive to the flow of poetic imagery. In *Poetics of Reverie*, he considers the absolute origins of that imagery: language, sexuality, childhood, the Cartesian ego and the universe. Approaching the psychology of wonder from the phenomenological viewpoint, Bachelard demonstrates the auriferous potential of all that awareness. Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which poetry puts on the right track, the track of expanding consciousness.

Applying Domain-Driven Design and Patterns Jimmy Nilsson, 2006-05-08. Patterns, Domain Driven Design (DDD) and Test Driven Development (TDD) enable architects and developers to create systems that are powerful, robust and maintainable. Now there's a comprehensive practical guide to leveraging all these techniques, primarily in Microsoft .NET environments, but the discussions are just as useful for Java developers. Drawing on seminal work by Martin Fowler, *Patterns of Enterprise Application Architecture* and Eric Evans, *Domain Driven Design*, Jimmy Nilsson shows how to create real world architectures for any .NET application. Nilsson illuminates each principle with clear, well annotated code examples based on C# 1.1 and 2.0. His examples and discussions will be valuable both to C# developers and those working with other .NET languages and any databases, even with other platforms such as J2EE. Coverage includes: Quick primers on patterns, TDD and refactoring; Using architectural techniques to improve software quality; Using domain models to support business rules and validation; Applying enterprise patterns to provide persistence support via NHibernate; Planning effectively for the presentation layer and UI testing.

Ordered Algebraic Structures W.C. Holland, Jorge Martínez, 2012-12-06 The conference on Ordered Algebraic Structures held in Curacao from the 26th of June through the 30th of June 1995 at the Avila Beach Hotel marked the eighth year of activities by the Caribbean Mathematics Foundation abbr CMF which was the principal sponsor of this conference CMF was inaugurated in 1988 with a conference on Ordered Algebraic Structures During the years between these two conferences the field has changed sufficiently both from my point of view and I believe that of my co organizer W Charles Holland to make one wonder about the label Ordered Algebraic Structures itself We recognized this from the start and right away this conference carried a subtitle or if one prefers an agenda we concentrated on the one hand on traditional themes in the theory of ordered groups including model theoretic aspects and on the other hand on matters in which topology more precisely C X style topology and category theory would play a prominent role Plainly ordered algebra has many faces and it is becoming increasingly difficult to organize an intimate conference such as the ones encouraged in the series sponsored by CMF in this area on a broad set of themes These proceedings reflect accurately we think the spirit of the conferees but it is not a faithful record of the papers presented at the conference
