Organized in a globally recognized sequence and systematically framed to augment dexterity. Elucidates concise text with clear and simple terminologies. Content is richly supported by figures and tables. Provides an enhanced lucidity in the content. Chapter content is presented under different heads like Overview, Supplies, Patient and Family Education, Assessment and Preparation, Procedure, Monitoring and Care, Expected and Unexpected Outcomes, and Documentation. Content is focused on the procedures specific to Obstetric Nursing and Midwifery. Videos related to the procedures are available on the MedEnact website.

Clinical Nursing Practices E-Book Elizabeth Jamieson, Janice M. McCall, Lesley A. Whyte, 2007-04-05. This title is directed primarily towards health care professionals outside of the United States. It is a well-known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings. The development of competence in these practices is one of the most important aspects of pre-registration programmes and this is one of the few UK-based texts that takes an educational approach to these practices as opposed to a purely procedure-driven approach. As in previous editions, the emphasis is on a holistic approach with the recognition that each patient is a unique individual. Each procedure contains rationale and information for patient education in addition to step-by-step guidance. Skills explained step-by-step to facilitate learning. The comprehensive range of procedures, including advanced practices, will give readers confidence when they begin clinical work. Relevance to hospital and community settings makes it applicable to a wide audience. The rationale sections link to the evidence base, thereby ensuring best practice.

Critical Care Manual of Clinical Procedures and Competencies Jane Mallett, John Albarran, Annette Richardson, 2013-05-15. This manual is aimed at all healthcare practitioners from novice to expert who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence-based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview, beginning with basic principles and progressing to more complex ideas to support practitioners to develop their knowledge, skills, and competencies in critical care.
