

Nursing Care and Treatment of the

RETARDED MENTALLY ILL

by Patty M. Hodgins, RN, and Michael J. Monfils, ACSW

Due to deinstitutionalization and the rise of community-based programs for the mentally retarded, increasing numbers of retarded citizens are being served in community residences and educational or vocational programs. The Association for Retarded Citizens of the United States (1984) notes that the number of residents in public institutions for the retarded in America has shrunk from a high of near 193,000 in 1967 to a current figure of approximately 115,000.

As these retarded individuals make the transition to community living, they may display emotional disorders ranging from transient behavioral disturbances to psychoses such as schizophrenia. Menolascino (1983) has noted that the frequency rate of mental ill-

ness in the retarded ranges from 20% to 35%, a rate exceeding that of the general population. A need exists, therefore, for specialized mental health services for the retarded person with an allied mental illness.

In 1979, the Mental Retardation Unit of the Nebraska Psychiatric Institute was designed and implemented. The specific goals of this 15 bed unit are:

1. To provide acute, short-term psychiatric care and treatment for Nebraska's mentally retarded-mentally ill and support their integration into community-based mental retardation programs across Nebraska, as well as other states;

2. To conduct applied research efforts in modern diagnostic, treatment, and management approaches in this area;
3. To provide professional training and educational opportunities for students and residents from the fields of medicine, pharmacology, psychology, nursing, social work, and recreational and occupational therapy within the University of Nebraska Medical Center;
4. To serve as a national demonstration model in the treatment of this challenging "dual diagnosis" population.
