Psychiatric Nursing Peggy Martin, 1987-11-11. In line with the recommendations of Project 2000 and the 1982 RMN syllabus, this is an important new book which takes a fresh look at the requirements of trainee psychiatric nurses and their teachers. The book is divided into two parts. Part One: Concepts establishes the nurses' approach to psychiatric care as an individual and as a member of a team. Part Two: Care explores the application of concepts through numerous patient profiles and care plans based on conceptual models. The text is well illustrated and attractively designed throughout. The author, Peggy Martin, is closely involved in nurse training and, as well as being aware of the needs of the practising nurse, has a strong commitment to Peplau's developmental model which she has used in this book.

000 per year and some spend from 10 to 15 years in a nursing home for a total cost of 220 000 to 330 000 National Library of Medicine Current Catalog National Library of Medicine (U.S.),1982 *Basic Concepts of Psychiatric-mental Health Nursing* Louise Rebraca Shives,Ann Isaacs,2002 The Fifth Edition of this basic text provides essential coverage of psychiatric mental health nursing New to this edition are increased focus on clinical application of content cultural issues care across the continuum including homeless shelters and forensic sites and discussions of contemporary topics such as dual diagnosis grief counseling and issues of violence survivors The text's simple friendly tone explains the essentials offers dependable guidance and provides a solid foundation for study A printed instructor's manual and testbank are included

Psychiatric-mental Health Nursing Barbara Schoen Johnson,1989 Psychiatric Mental Health Nursing Faye Gary,Charlene Kate Kavanagh,1991 *Mental Health-psychiatric Nursing* Ruth Parmelee Rawlins,Sophronia R. Williams,1984 **Psychiatric-mental Health Nursing** Patricia A. Clunn,Dorris B. Payne,1986 **Theoretical Nursing** Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher Current Catalog National Library of Medicine (U.S.),1982 First multi year cumulation covers six years 1965 70 *Advanced Practice Psychiatric Nursing* Ann Wolbert Burgess,1997 In this era of managed care this text helps health professionals properly assess manage and monitor the overall care of persons who have emotional and psychiatric problems This new text includes practical clinical skills numerous case studies and references and suggested readings at the end of each chapter In addition this book thoroughly explains effective collaboration with other health disciplines including when to seek referral and consultation Nurses nurse practitioners *Suicide-Related Behaviour* Columba McLaughlin,2007-06-29 The book is an attempt to make sense of suicide related behaviour in terms of understanding its aetiology and how practitioners can respond in a caring and therapeutic manner The last 30 years the data gathered has consistently indicated that suicide is a leading cause of death in young people especially men Alongside this the incidence of self harm which has always been high does not seem to be abating Some professionals argue that attempted suicide and self harm are both the same entity This book puts forward that they are two sides of the same coin and this coin is called suicide related behaviour This is a general term used

in the book to describe all behaviours where the person intended to kill or harm themselves In doing so relevant issues within the phenomenon of suicide related behaviour and specific to both self harm and attempted suicide will be explored and addressed
