Resources for Nursing Research Cynthia Clamp, Stephen Gough, Lucy Land, 2005-01-11 The 4th edition of this extensive text is an outstanding resource prepared by nurses and a librarian for nurses. In a structured and helpful style it presents thousands of items from the literature published papers, reports, books, and electronic resources as a clear, accessible, and most of all, useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well conceived, and the 'How to use this book' section is remarkably simple. The book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks. RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research and includes references for books, journal papers, and Internet resources. Designed to act as a signpost to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care, and the social sciences. Entries are concise, informative, and accessible, and are arranged under three main sections. Sources of Literature covers the process of literature searching, including using libraries and other tools for accessing literature. Methods of Inquiry includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data. The Background to Research in Nursing encompasses the development of nursing research, the profession's responsibilities, the role of government funding, research roles and careers, and education for research. Fully revised and updated, the Fourth Edition includes just under 3000 entries, of which 90% are new. It has extensive coverage of US, UK literature, and other international resources.
