*Nutraceuticals* María Chávarri Hueda, 2020-01-15 Today's society is increasingly aware of the importance of food and health. For this reason, consumers increasingly demand more products that help prevent disease. In this sense, science and technology are helping to find new bioactive compounds that when properly administered can provide beneficial health effects. Among these compounds are nutraceuticals: concentrated natural bioactive substances available in pills, capsules, and powders among other forms. This book comprehensively reviews and compiles information on molecules that can help prevent and treat prevalent diseases.

**Handbook of Nutraceuticals Volume I** Yashwant Vishnupant Pathak, 2009-11-24 The first reference of its kind, this volume analyzes nutraceutical extracts and formulations in a pharmacopoeia-like manner. Introductory chapters provide detailed scientific information on characterization and methods for developing reproducible products including Good Manufacturing Procedure (cGMP) requirements. All of the individual monographs on more than 175 nutraceuticals follow a unified format. Each is characterized by origin and as many as 17 properties including non-proprietary names, chemical name, CAS no, and applications. A second section focuses on formulations aimed at specific diseases or disorders. The text also includes chapters on safety and toxicity of nutraceuticals.

**Advances in Nutraceutical Applications in Cancer: Recent Research Trends and Clinical Applications** Sheeba Varghese Gupta, Yashwant V Pathak, 2019-10-23 Dietary supplements and nutraceuticals such as Vitamin A and D, Omega 3, and probiotics are used as part of the cancer treatment as complementing the main therapy. Several Nutraceuticals have shown to boost the immune responses while emerging clinical studies and other research suggests that some plant-based agents may indeed impact late-stage cancer, influencing molecular processes corrupted by tumor cells to evade detection, expand clonally, and invade surrounding tissues. *Advances in Nutraceutical Applications in Cancer: Recent Research Trends and Clinical Applications* is an attempt to collect evidence and related clinical information of application of Nutraceuticals to be used in cancer treatment or complement the cancer treatment. It contains 16 chapters written by experts in related fields and covers many different aspects of the formulation and development of Nutraceuticals for cancer applications. This book covers efficacy, safety, and toxicological aspects of nutraceuticals. It also addresses various novel drug delivery systems of nutraceuticals with anticancer properties as well as nutraceuticals as supplements for cancer prevention.
