Nutrition 2002 Update:

Updates on Clinical and Molecular Epidemiology of Tuberculosis Weimin Li, Haican Liu, Yang Yang, Hui Jiang, 2024-03-08

Addressing the tuberculosis TB epidemic is crucial to reduce morbidity mortality and health care burden Cases of confirmed drug resistant TB have almost doubled over the past decade Drug resistance represents one of leading causes of death among TB patients and is responsible for approximately one third of TB related deaths worldwide which is associated with TB recurrence and transmission In recent years the emerging molecular epidemiology methods have attributed to better TB management For example in many settings studies using molecular epidemiology methods have demonstrated the recent transmission of Mycobacterium tuberculosis M TB strains However the transmission patterns of drug resistant TB in most low and middle income developing countries remain unclear Traditional transmission models based on clinical and epidemiological parameters were not sufficient to identify potential risk factors By using molecular epidemiology analysis further insights can be gained into the association between M TB isolates and epidemic populations This makes molecular epidemiology studies effective measures to establish phylogenetic relationships with clinical patients identify clusters and track TB transmission Studies investigating clinical and molecular epidemiology will provide theoretical basis and scientific strategy for TB prevention and control We hope to address the TB associated health care burden and the current insufficient or imprecise control strategies for TB management More importantly we would like to discuss more efficient approaches in this field with the development of molecular epidemiology method and share insights to reduce TB burden

Nutritional Management of Diabetes Mellitus and Dysmetabolic Syndrome John P. Bantle, G. Slama, 2006-01-01

Evaluating treatment and prevention strategies Over the next decade the global number of people with diabetes and at risk of diabetes and cardiovascular disease is expected to grow by 25% largely driven by the rising prevalence of obesity and inactivity The problem is especially serious in Asia where the WHO predicts that in less than a decade 60% of the worldwide population with diabetes will be found In order to avoid that the disease turns into a huge economic burden individuals at risk must be identified and prevention and suitable treatment interventions implemented Conceding that the optimal diet for diabetes has yet to be defined and that nutrition and lifestyle management must be individualized to enhance the potential for a successful outcome this publication examines the impact of lifestyle which includes both nutritional management and physical activity in the prevention and treatment of diabetes Among the topics addressed are the dysmetabolic syndrome glycemic effect of carbohydrates glycemic control and beyond diabetes in the life cycle as well as the role of drugs and dietary therapy Written by leading experts in the field the papers collected in this publication contain a wealth of information for nutritionists dietitians physicians and epidemiologists *Nutrition and Diet Therapy* Carroll A Lutz, Erin Mazur, Nancy Litch, 2014-08-14 Meet the ever changing demands of providing quality nutritional care for patients across the lifespan This popular text provides a strong foundation in the science of nutrition and a clear understanding of how to apply that knowledge in practice recognizing the need for nurses to work with other healthcare professionals to ensure optimal nutrition in patient care Updates and Advances in Nephrolithiasis Layron Long, 2017-08-23 In recent decades we have

enhanced our understanding of the pathophysiology and genetics of rare and common causes of kidney stones With our evolving understanding of the epidemiology biology and genetics of nephrolithiasis and the advances in therapeutic technologies we have made significant progress in patient care Furthermore advances in the medical management and surgical technologies have allowed us to embellish the optimal outcomes in the management of complex kidney stone disease
