**Gold Rush** Mark A. Eifler, 2016-07-22 In January of 1848 James Marshall discovered gold at Sutter's Mill in the foothills of the Sierra Nevada. For a year afterward news of this discovery spread outward from California and started a mass migration to the gold fields. Thousands of people from the East Coast aspiring to start new lives in California financed their journey West on the assumption that they would be able to find wealth. Some were successful, many were not, but they all permanently changed the face of the American West. In this text Mark Eifler examines the experiences of the miners, demonstrates how the gold rush affected the United States, and traces the development of California and the American West in the second half of the nineteenth century. This migration dramatically shifted transportation systems in the US, led to a more powerful federal role in the West, and brought about mining regulation that lasted well into the twentieth century. Primary sources from the era and web materials help readers comprehend what it was like for these nineteenth-century Americans who gambled everything on the pursuit of gold.

**Herbal Cosmetics Handbook (3rd Revised Edition)** H. Panda, 2015-04-09 Cosmetics have been in utilization for more than thousands of years. More commonly known as make-up, it includes a host of skin products like foundation, lip colors, etc. The international market for skincare and color cosmetics surpassed a sale of 53 billion dollars in 2002. The quantity and number of latest products brought to market, both nationally and internationally, continues to develop at a fast pace. Cosmetic chemists all the time are looking for attractive and striking material that enhances skin's appearance and healthiness. A huge collection of compounds is required to supply these products. The newest edition of the Cosmetics, Toiletries, and Fragrance Association (CTFA) Dictionary displays more than 10,000 raw materials, and the list continues to increase with every year, hundreds of new ingredients being added. The cosmetic chemistry encompasses a vast area of study, and one such is Herbal Cosmetics. Herbal cosmetics are the product of cosmetic chemistry, a science that combines the skills of specialists in chemistry, physics, biology, medicine, and herbs. Since cosmetics are applied mostly to the skin, hair, and nails, a brief description of the anatomy of these is desirable. Herbal cosmetic major users are girls and women who are very much peculiar about their skin type and requirement. Synthetic cosmetic being harsh and prone to more side effects, herbal cosmetic is quickly replacing it and gaining a lot of popularity. As a result, it has created an enormous market for itself, both domestic as well as export market. Herbal Cosmetics Handbook has been featured as best seller. The book contains formulae, manufacturing processes of different herbal cosmetics like cosmetics for skin, nails, hair, etc. It also covers analysis, method of cosmetics toxicity, and test method. Some of the chapters of the book are: Classification of cosmetics, Economic aspects, Cosmetic Emulsions, Cosmetics for the skin, Cosmetic Creams, Lubricating or Emollient Creams, Night Creams, Skin Protective and Hand Creams, Vanishing Creams, Foundation Creams, Liquid Creams, Cosmetic Lotions, Hand Lotions, Skin Toning Lotions, Skin Fresheners, Astringent Lotions, Hair Tonics, and many more. The book will render useful purpose for new entrepreneurs, technologists, professionals, researchers, and for those who want to extend their knowledge in the said field.
