Intelligent Algorithms for Packing and Cutting Problem Yunqing Rao, Qiang Luo, 2022-10-03 This book investigates in detail the two dimensional packing and cutting problems in the field of operations research and management science. It introduces the mathematical models and intelligent solving algorithms for these problems as well as their engineering applications. Most intelligent methods reported in this book have already been applied in reality which can provide reference for the engineers. The presented novel methods for the two dimensional packing problem provide a new way to solve the problem for researchers interested in operations research or computer science. This book also introduces three new variants of packing problems and their solving methods which offer a different research direction. The book is intended for undergraduate and graduate students who are interested in the solving methods for packing and cutting problems, researchers investigating the application of intelligent algorithms, scientists studying the theory of the operations research and CAM software developers working on integration of packing and cutting problem.

Antiviral Agents Catherine Adamson, 2021-01-21 Antiviral agents are used for the treatment of viral diseases. Antiviral drugs have been successfully developed and used clinically for a limited number of important human viral diseases notably caused by human immunodeficiency virus, HIV, hepatitis C virus, HCV, hepatitis B virus, HBV, herpes and influenza viruses. Despite the successes of these antiviral drugs, issues with drug resistance and toxicity remain challenging. These challenges are driving research to identify new drug candidates and to investigate novel drug targets to develop new mechanistic drug classes. Antiviral agents are not available against many viruses that cause human disease and economic burdens. In particular, the development of antiviral agents against emerging, re-emerging and neglected viruses is increasingly becoming a priority. This book includes six review articles that discuss new antiviral strategies. The reviews either discuss advances relating to a specific virus or new therapeutic targets and approaches. The book includes 15 original research articles reporting new antiviral agents against a variety of clinically and economically important viruses and studies into the prevalence or acquisition of drug resistance. Overall, this book is an exciting collection of new research and ideas relating to the development of antiviral agents.

Radical Campus Hugh Johnston, 2009-09-01 This engaging history of a university and an era traces the formative years of Simon Fraser University in Burnaby, BC. SFU was born in a period of ferment and flux when ideas about education were changing so rapidly and the western world was starting to feel the impact of student activism, the Civil Rights movement and opposition to the Vietnam

War Promoted as an open innovative university SFU attracted more mature students and far younger and more idealistic faculty than other schools The stage was set for educational and political fireworks Radical Campus traces those first exhilarating confusing and profoundly educational years from the search for an architect who could produce an extraordinary design to the hiring of young professors from all over the world to the uproar caused when Chancellor Gordon Shrum declared himself against tenure for faculty All contributed to SFU s reputation as a radical difficult obstreperous place In fact the university rapidly became a lightning rod in an unforgettably creative era in post secondary education in the Western world From the tumult of its first years SFU has emerged to become one of Canada s most respected universities youthful energetic rigorous and still growing and learning

Born at the Right Time Doug Owram, 1997-12-15 It is rare in history for people to link their identity with their generation and even rarer when children and adolescents actually shape society and influence politics Both phenomena aptly describe the generation born in the decade following the Second World War These were the baby boomers viewed by some as the spoiled selfish generation that had it all and by others as a shock wave that made love and peace into tangible ideals In this book Doug Owram brings us the untold story of this famous generation as it played out its first twenty five years in Canadian society Beginning with Dr Spock s dictate that this particular crop of babies must be treated gently Owram explores the myth and history surrounding this group from its beginning at war s end to the close of the 1960s The baby boomers wielded extraordinary power right from birth Owram points out and laid their claim on history while still in diapers He sees the generation s power and sense of self stemming from three factors its size its affluent circumstance and its connection with the 1960s the fabulous decade of free love flower power women s liberation drugs protest marches and rock n roll From Davy Crockett hats and Barbie dolls to the civil rights movement and the sexual revolution the concerns of this single generation became predominant themes for all of society Thus Owram s history of the baby boomers is in many ways a history of the era Doug Owram has written extensively on cultural icons Utopian hopes and the gap between realities and images all powerful themes in the story of this idealistic

generation A well researched lucid and humorous book Born at the Right Time is the first Canadian history of the baby boomers and the society they helped to shape **Making Policy in Turbulent Times** Paul Axelrod, Roopa Desai Trilokekar, Theresa Shanahan, Richard Wellen, 2013-09-01 How is policy made in higher education particularly in the wake of recent economic turbulence Has policy development converged internationally and if so what impact has this had on academic life and institutions What role does policy oriented research play in shaping the direction of higher education Are universities grappling in common ways with issues of access and equity Making Policy in Turbulent Times provides a historically informed and nuanced response to these and other questions Distinguished scholars and administrators from across the globe identify economic challenges and pressures facing universities compare policy developments in numerous jurisdictions and demonstrate the ways in which networks and lobbyists achieve results Cogently argued Making Policy in Turbulent Times contributes significantly to new research and will be of great interest to scholars and practitioners alike

My Life on Earth and Elsewhere R. Murray Schafer, 2014-05-14 Music is central to many of R Murray Schafer's memories. One of the sounds that I'd almost forgotten until I began to write this chronicle was the tinkling of the piano keys when my mother used to wipe them with a wet cloth, he writes. In the early years the high and low keys would be passed over quite quickly while the middle notes got the heavy scrubbing. The detail of this small nearly forgotten childhood memory is a poignant example of the way sounds can remain present in the imagination even when they are originated in the distant past. Schafer recounts childhood summers spent in Manitoba lassoing gophers and being paid two cents a head for them and a music education marked by his cheerful but total resistance to the conventional instruction that was available. His youthful travels in Germany, France, Austria, Italy, and Eastern Europe are recreated in a lively impressionist style with plenty of comic and melancholy stories gleaned from his diaries of the time, including an account of a folk music convention in Communist Romania which he attended with imaginative but shaky credentials identifying him as a representative of the CBC The Globe and Mail, the University of Toronto Press, and even the Kiwanis Club. The conference proving dull, Schafer eluded the government minders and took an unauthorized trip to see a girl he had met on the train and, despite knowing nothing of the language, spent an idyllic few days with her at her parents' remote village while the police questioned every young man with a beard in the area of Bucharest in a fruitless search for the suspected spy. On his return to Canada, teaching assignments took him first to Newfoundland then to Vancouver where he created the World Soundscape Project. In 1975 Schafer resigned from university teaching and for many years has devoted himself full time to writing and composing. *My Life on Earth and Elsewhere* continues the story of his domestic and international musical adventures up to the present day. Integer Programming and Combinatorial Optimization Friedrich Eisenbrand, Jochen Koenemann, 2017-06-06 This book constitutes the refereed proceedings of the 19th International Conference on Integer Programming and Combinatorial Optimization IPCO 2017 held in Waterloo, ON, Canada, in June 2017. The 36 full papers presented were carefully reviewed and selected from 125 submissions. The conference is a forum for researchers and practitioners working on various aspects of integer programming and combinatorial optimization. The aim is to present recent developments in theory, computation, and applications in these areas. The scope of IPCO is viewed in a broad sense to include algorithmic and structural results in integer programming and combinatorial optimization as well as revealing computational studies and novel applications of discrete optimization to practical problems. Principles and Practice of Constraint Programming - CP 2007 Christian Bessière, 2007-10-11 This book constitutes the refereed proceedings of the 13th International Conference on Principles and Practice of Constraint Programming CP 2007. It contains 51 revised full papers and 14 revised short papers presented together with eight application papers and the abstracts of two invited lectures. All current issues of computing with constraints are addressed, ranging from methodological and foundational aspects to solving real world problems in various application fields.

The Methodology of Economic Model Building (Routledge Revivals) Lawrence A. Boland, 2014-05-01

The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper s falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics
