Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the

recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Wood in Archaeology Lee A. Newsom, 2022-01-20 In this book Lee A Newsom offers an overview of wood in archaeology how and where it is preserved and analyzed its relevance to paleoecological and paleoenvironmental questions as well as its role as an important source of information in modern archaeological science and related historical disciplines Her book addresses a range of questions about wood reliance practices sustainability and the overall relevance of forest ecosystems to past cultures and cultural evolution Newsom provides a step by step treatment of archaeological analysis with clear explanations and examples from various corners of the world She also shows how the study of archaeological wood is relevant to modern restoration ecology and conservation biology that tracks long term ancient ecosystems including questions of global change Demonstrating the vital role of wood and timber resources to past human societies her book will interest scholars and students of archaeology historical ecology paleoecology and wood science
