Wirtschaftsgeschichte Siedlung Einzelfund The Pleistocene Old World Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually untouched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole constructs of functioning sociocultural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider

the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change. These presentations integrate findings and understandings derived from a number of related disciplines actively involved in researching the past. Data and interpretations are offered on a range of Old world regions during the Paleolithic including Africa, Asia, Australia, and Europe, and chronological coverage spans from the Early to Late Pleistocene.
