Several obelisks are positioned around the grid, with lines radiating from a central point on the horizon, passing through the tops of the obelisks and extending across the grid.

Paths To Success Beating The Odds In American Society:

Paths to Success Charles C. Harrington, Susan K. Boardman, 2000-10-16 Statisticians tell us that impoverished backgrounds are decent predictors of impoverished futures This book seeks out the stories behind the exceptions While the authors reveal consistencies between pathmakers approaches and those of their middle class counterparts it also exposes striking differences between men and women blacks and whites Paths to Success Charles C. Harrington, Susan K. Boardman, 2000-10-16 Who would have thought that Joycelyn Elders born into a family that chopped cotton and trapped raccoons to survive would grow up to be Surgeon General of the United States Or that Clarence Thomas brought up by his barely literate grandfather would someday be a Justice of the Supreme Court Certainly not statisticians who tell us that impoverished backgrounds are fairly accurate predictors of impoverished futures This book seeks out the stories behind the exceptions those who against all odds have made the American myth of rags to riches a reality For more than ten years Charles Harrington and Susan Boardman explored the life histories of successful Americans forty to fifty five years old those from poor homes whose parents had not completed high school and those from the middle class Comparing the routes to success of these two groups the one by various courses of their own construction the other by a well laid path the authors are able to show where their efforts and qualities diverge and where they coincide Joycelyn Elders and Clarence Thomas are examples of the pathmakers of this work While *Paths to Success* reveals certain consistencies between these pathmakers approaches and those of their middle class counterparts it also exposes striking differences between men and women blacks and whites These differences fully described here illuminate the ways in which opportunities serendipities and impediments intersect with personal resources strategies and choices to produce success where we least expect it *International Handbook of Migration, Minorities and Education* Zvi Bekerman, Thomas Geisen, 2011-10-06 Migrants and minorities are always at risk of being caught in essentialized cultural definitions and being denied the right to express their cultural preferences because they are perceived as threats to social cohesion Migrants and minorities respond to these difficulties in multiple ways as active agents in the pedagogical political social and scientific processes that position them in this or that cultural sphere On the one hand they reject ascribed cultural attributes while striving towards integration in a variety of social spheres e g school and workplace in order to achieve social mobility On the other hand they articulate demands for cultural self determination This discursive duality is met with suspicion by the majority culture For societies with high levels of migration or with substantial minority cultures questions related to the meaning of cultural heterogeneity and the social and cultural limits of learning and communication e g migration education or critical multiculturalism are very important It is precisely here where the chances for new beginnings and new trials become of great importance for educational theorizing which urgently needs to find answers to current questions about individual freedom community cultural affiliations and social and democratic cohesion Answers to these questions must account for both political and learning perspectives at the macro

mezzo and micro contextual levels The contributions of this edited volume enhance the knowledge in the field of migrant minority education with a special emphasis on the meaning of culture and social learning for educational processes
