Pathways From The Periphery The Politics Of Growth In The Newly Industrializing Countries:

Pathways from the Periphery Stephan Haggard, 1990 *Pathways from the Periphery* is an innovative interpretation of the development of the newly industrializing countries NICs which now dominate Third World industry and manufacturing trade. While such countries as Brazil and Mexico have achieved industrialization through strategies intended to foster self-reliance, the East Asian NICs South Korea, Taiwan, Hong Kong, and Singapore have grown rapidly through an aggressive policy promoting the export of manufactured goods. Stephan Haggard provides the first comprehensive comparison of the politics of industrialization in these East Asian and Latin American countries and offers new evidence on current issues in comparative political economy, including the implications of different growth paths for dependency, equity, and democracy. Recognizing the influence on development strategies of external shocks such as depression, war, and reduced access to foreign capital, Haggard emphasizes the importance of domestic political institutions for economic decision making. The East Asian NICs are characterized by close but regulated business-government alliances, weak labor movements, and politically insulated and administratively capable states. Factors Haggard shows that have facilitated flexible and coherent industrial policies. He argues that domestic policy choices can shape the external constraints states face. The author considers in detail why Latin America's long-standing efforts to achieve self-reliance have ironically resulted in a dependence on international capital greater than that of the East Asian countries. Addressing a long-standing debate on the relationship between industrialization strategy and regime type, Haggard carefully assesses the connection between growth and democratic politics. Despite their authoritarian growth models, the Asian NICs have, he observes, achieved greater equity than their Latin American counterparts. Although the success of export-led growth has in the past been associated with authoritarian rule, Haggard argues that no compelling theoretical reasons preclude democratic governments from achieving strong economic performance. Breaking new ground in theoretical inquiry and empirical research, *Pathways from the Periphery* will be welcomed by political economists, scholars, and students of comparative politics, historians of Asian and Latin American public policy, and others concerned with the challenge of economic development.

Pathways from the Periphery Stephan Haggard, 1984 The Politics of Economic Adjustment Stephan Haggard, Robert R. Kaufman, 2018-06-05 In the 1980s some developing countries adopted orthodox market-oriented policies in response to international economic crises; others experimented with alternative programs; and still others failed to develop coherent adjustment strategies of any sort. Building on the case studies in *Economic Crisis and Policy Choice*, these essays offer comparative analysis of these divergent experiences with macroeconomic stabilization and structural adjustment. Barbara Stallings and Miles Kahler explore the external pressures on governments. Peter Evans and John Waterbury examine the role of the state in the adjustment process. Evans through the lens of earlier historical experience with economic restructuring. Waterbury by focusing on the politics of privatization. Joan Nelson analyzes the politics of income distribution in the adjustment process, and Haggard and Kaufman

investigate the political correlates of inflation and stabilization A final essay assesses the prospects for combining market oriented reforms with political democratization **The Newly Industrializing Economies of East Asia** Anis Chowdhury,Iyanatul Islam,2005-08-09

The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends *United States Trade Relations with the Newly Industrializing Countries in the Pacific Basin* Won Kwang Paik,2018-11-02

With the resurgence of new Protectionism international trade and trade relations are once again prime topics for study This book first published in 1997 examines in detail the different ways to answer the questions What are the causes of trade relations And specifically what factors determine a flow of commodities from one country to another **The Newly Industrialising Economies of East Asia** Anis Chowdhury,Iyanatul Islam,1993

In surveying the vast range of writing on the East Asian NIEs and their development paths this book evaluates the competing roles of neo classical approaches and central government intervention in guiding economic development The Oxford Handbook of the Politics of Development Carol Lancaster,Nicolas van de Walle,2018-05-01

In many discussions of nations development we often focus on their economic and social development Is it becoming wealthier Is its society modernizing Is it becoming more technologically sophisticated Are social outcomes improving for the broad mass of the public The process of development policy implementation however is always and inevitably political Put simply regime type matters when it comes to deciding on a course of development to follow Further political institutions matter When a government s institutional capacity is low the chances of success severely decline regardless of the merits of the development plan In The Oxford Handbook of the Politics of Development two of America s leading political scientists on the issue Carol Lancaster and Nicolas van de Walle have assembled an international cast of leading scholars to craft a broad state of the art work on this vitally important topic This volume is divided into five sections major theories of the politics of development organized historically e g modernization theory dependency theory the Washington consensus of policies without politics etc key domestic factors and variables key international factors and variables political systems and structures and geographical perspectives inclusive of regional dynamics A comprehensive and cross regional examination on key issues of political development this Handbook not only provides an authoritative synthesis of past scholarship but also sets the agenda for future research in this discipline **The Politics of Reform in Ghana, 1982-1991** Jeffrey Herbst,2023-04-28

reform was the most pressing question for African and other Third World countries during the 1980s In this first full length examination of the political economy of adjustment in Ghana Jeffrey Herbst describes the causes of Ghana s dramatic economic decline and reviews the politics of reform that began in 1983 Since Ghana was one of the first African countries to adopt a comprehensive reform program and the one that has sustained adjustment longest the Ghanaian experience has profound ramifications for debates regarding stabilization and structural change across the continent Herbst devotes special attention to the interaction between the type of government and the politics of adjustment the reaction of interest groups such as urban labor and the peasantry and the relationship between economic and political change His extended field research and sophisticated knowledge of the issues involved both from the economic and political science literature make this study of importance not only to Africanists political scientists economists and sociologists but also to government and financial leaders wrestling with economic reform in developing countries This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1993

Regionalization and Globalization in the Modern World Economy Alex E. Fernandez Jilberto, Andre Mommen, 2002-01-22 This collection explores the importance of regionalization and globalization to the world economy particularly questioning whether the world economy is characterized by increasing regionalization rather than globalization International contributors explore the processes in the Pacific area the Americas Africa and Europe and make an important contribution to current debates in development economics

Hard Times in the Lands of Plenty Benjamin Smith, 2011-05-02 That natural resources can be a curse as well as a blessing is almost a truism in political analysis In many late developing countries the resource curse theory predicts the exploitation of valuable resources will not result in stable prosperous states but rather in their opposite Petroleum deposits for example may generate so much income that rulers will have little need to establish efficient tax extracting bureaucracies leading to shallow poorly functioning administrations that remain at the mercy of the world market for oil Alternatively resources may be geographically concentrated thereby intensifying regional ethnic or other divisive tensions In *Hard Times in the Land of Plenty* Benjamin Smith deciphers the paradox of the resource curse and questions its inevitability through an innovative comparison of the experiences of Iran and Indonesia These two populous oil rich countries saw profoundly different changes in their fortunes in the period 1960 1980 Focusing on the roles of state actors and organized opposition in using oil revenues Smith finds that the effects of oil wealth on politics and on regime durability vary according to the circumstances under which oil exports became a major part of a country s economy The presence of natural resources is he argues a political opportunity rather than simply a structural variable Drawing on extensive primary research in Iran and Indonesia and quantitative research on nineteen other oil rich developing countries

Smith challenges us to reconsider resource wealth in late developing countries not as a simple curse or blessing but instead as a tremendously flexible source of both political resources and potential complications
