Patient As Consumer:

Making the Patient-consumer Alex Mold, 2015 Over the last fifty years British patients have been transformed into consumers This book considers how and why the figure of the patient consumer was brought into being paying particular attention to the role played by patient organisations Making the patient consumer explores the development of patient consumerism from the 1960s to 2010 in relation to seven key areas Patient autonomy representation complaint rights information voice and choice were all central to the making of the patient consumer These concepts were used initially by patient organisations but by the 1990s the government had taken over as the main actor shaping ideas about patient consumerism This volume is the first empirical historical account of a fundamental shift in modern British health policy and practice The book will be of use to historians public policy analysts and all those attempting to better understand the nature of contemporary healthcare

Curing Consumers: How the Patient Became a Consumer in Modern American Medicine Nancy Stark Lee, 2007 This dissertation addresses the widespread practice of calling the patient a consumer in contemporary discourses about health and medicine in the United States Despite its common usage little is known of the historical origins of this construct how it entered popular discourse and the symbolic and social significance of conceptualizing the patient as a consumer to current health care debates Through historical research that spans the years 1930 to 2006 this study traces the patient consumer metaphor to the patients rights movement of the 1960s Ideas about patient empowerment and rights emerged only after that decade s social and cultural transformations reduced the public s trust in traditionally authoritative and paternalistic institutions such as medicine Calling the patient a consumer was a rhetorical tactic first popularized by the 1960s social movements involved in expanding patients rights including the consumer movement led by Ralph Nader This periodization is supported by findings from a historical textual analysis of mainstream magazine articles on health and medicine from 1930 to 1969 that indicate the patient as an empowered health care consumer was not part of normative expectations of patienthood before the 1960s Textual analysis of self help literature magazine and newspaper articles since the 1970s show how the patient consumer metaphor s connotations of empowerment

and personal autonomy in health decisions were co-opted and reduced to simple messages about consumer sovereignty by the 1980s as the US health care sector became increasingly corporatized under successive neoliberalist administrations. This dissertation's findings contribute to a more nuanced historically based understanding of the ramifications of patient consumerism to better enable and support critiques of the American health care system.

Technology, health, and the patient consumer in the twentieth century Rachel Elder, Thomas Schlich, 2025-02-18 Technology and consumerism are two characteristic phenomena in the history of medicine and healthcare yet the connections between them are rarely explored by scholars. In this edited volume the authors address this disconnect noting the ways in which a variety of technologies have shaped patients' roles as consumers since the early twentieth century. Chapters examine key issues such as the changing nature of patient information and choice, patients' assessment of risk and reward and matters of patient role and of patient demand as they relate to new and changing technologies. They simultaneously investigate how differences in access to care and in outcomes across various patient groups have been influenced by the advent of new technologies and consumer-based approaches to health. The volume spans the twentieth and twenty-first centuries, spotlights an array of medical technologies and health products and draws on examples from across the United States and United Kingdom.

Risk Management in Health Care Institutions Florence Kavalier, Allen D. Spiegel, 2003 Risk management for health care institutions involves the protection of the assets of the organizations, agencies and individual providers from liability. A strategic approach can result in significant cost savings. Risk Management in Health Care Institutions: A Strategic Approach offers governing boards, chief executive officers, administrators and health profession students the opportunity to organize and devise a successful risk management program. Experts in risk management have contributed comprehensive up-to-date syntheses of relevant topics to assist with practical risk management strategies.

Patient-Centric Analytics in Health Care James J. Gillespie, Gregory J. Privitera, 2017-12-13 In Patient-Centric Analytics in Health Care: Driving Value in Clinical Settings and Psychological Practice James J. Gillespie and Gregory J. Privitera introduce a framework that explores the utility of analytics for managing care that is based on six key inputs of the health care system: patients, policy makers, providers, pharmacies, pharmaceuticals and payers. Understanding the roles of these 6 P's and the utility of analytics to promote data-driven decision models can lead to new innovations. These improvements can enhance quality, increase access and reduce costs and thereby drive value for the most important stakeholders in health care: the patients. As the accessibility and volume of data continues to increase, there is a growing desire to utilize data to guide and optimize decision making in health care environments. There is a wealth of data in health care organizations and much of it is not fully utilized. In today's climate these organizations are under increased regulatory and financial pressures to deliver measurable value, particularly as it

relates to the quality of patient care in clinical and diagnostic settings This book includes short contributions from practitioners including Laurie Branch Puneet Chahal Patrick C Cunningham Star Cunningham Matthew Dreckmeier Joseph P Gaspero Sherri Matis Mitchell Gail Mayeaux Edwin K Morris Plamen Petrov Steven Press Andrew J Privitera Derek Walton and Daniel Yunker Patient No Longer: How YOU Can Lead the Consumer Revolution in Healthcare, Second Edition Ryan Donohue, Stephen K. Klasko, 2025-03-28 Patient No Longer delves into the next phase of healthcare's evolution consumer centric care The authors challenge the status quo and explore how we can build a truly consumer driven healthcare system one that is data informed compassionate and ultimately meaningful for patients by answering a critical question What can we do now to transform our healthcare model into one that puts consumers at the center of the experience Drawing on new research and real world case studies the book analyzes long term effects of COVID 19 on healthcare revealing how the pandemic accelerated the shift toward patient centered care The book offers a fresh look at the progress and the work yet to be done in achieving a system in which providers partner with patients to create healthier communities This extensively revised edition features new content throughout including Information regarding potential for artificial intelligence AI to transform healthcare Ideas for improving patient experience to remove barriers to care With actionable insights and a forward thinking framework the book equips organizations to deliver the compassionate human centered care patients deserve **Proceedings [of] National Symposium on Patient's Rights in Health Care, May 17-18, 1976**, 1976

Complaints, Controversies and Grievances in Medicine Jonathan Reinartz, Rebecca Wynter, 2014-12-17 Recent studies into the experiences and failures of health care services along with the rapid development of patient advocacy consumerism and pressure groups have led historians and social scientists to engage with the issue of the medical complaint As expressions of dissatisfaction disquiet and failings in service provision past complaining is a vital antidote to progressive histories of health care This book explores what has happened historically when medicine generated complaints This multidisciplinary collection comprises contributions from leading international scholars and uses new research to develop a sophisticated understanding of the development of medicine and the role of complaints and complaining in this story It addresses how each aspect of the medical complaint between sciences professions practitioners and sectors within politics ethics and regulatory bodies from interested parties and patients has manifested in modern medicine and how it has been defined dealt with and resolved A critical and interdisciplinary humanities and social science perspective grounded in historical case studies of medicine and bioethics this volume provides the first major and comprehensive historical comparative and policy based examination of the area It will be of interest to historians sociologists legal specialists and ethicists interested in medicine as well as those involved in healthcare policy practice and management
