Patient Lover:

Fairbairn's Object Relations Theory in the Clinical Setting David P. Celani, 2010 W R D Fairbairn 1889 1964 challenged the dominance of Freud's drive theory with a psychoanalytic theory based on the internalization of human relationships. Fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect, insensitivity, and outright abuse that are impossible for the children to tolerate consciously. In Fairbairn's model, these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents. Attachment is paramount in Fairbairn's model as he recognized that children are absolutely and unconditionally dependent on their parents. Kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence. At the heart of Fairbairn's model is a structural theory that organizes actual relational events into three self and object pairs: one conscious pair, the central ego which relates exclusively to the ideal object in the external world; and two mostly unconscious pairs, the child's antilibidinal ego which relates exclusively to the rejecting parts of the object, and the child's libidinal ego which relates exclusively to the exciting parts of the object. The two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual's central ego. When they emerge, the other is misperceived as either an exciting or a rejecting object, thus turning these internal structures into a source of transferences and reenactments. Fairbairn's central defense mechanism, splitting, is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego, a near perfect model of the borderline personality disorder. In this book, David Celani reviews Fairbairn's five foundational papers and outlines their application in the clinical setting. He discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview. Incorporating decades of experience into his analysis, Celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic, obsessive, and borderline personality disorders.

Therapists Who Have Sex With Their Patients Herbert S. Streehan, 2018-10-24 First published in 1994. Therapists who use and abuse their power make for high talk show ratings and tabloid sales, but are these people simply to be written off as sick and evil? Dr. Herbert Streehan believes not. In this unflinchingly honest book, Dr. Streehan, who has treated such abusive caregivers many times in his practice, seeks to create a more humane portrait of therapists who have affairs with their patients. Central to the book are four fascinating case studies of therapists: Ronald S is a heterosexual psychiatrist with homosexual fantasies who wants to be a woman with his own male therapist; Roslyn M is a therapist who administers love treatment in the therapy room and charges for it; Bob W is a promiscuous sex addict who thinks, despite his physical unattractiveness, that all his women patients hunger for him; Al G is a sadomasochistic social worker who makes his female ex-patients suffer. These cases give voice to the feelings, fantasies, and dreams of therapists who have crossed the boundary. Through them, we come to

understand that it is treatment not punishment that will prevent others from falling prey to healers who are themselves in desperate need of healing

Literary Anatomies Delese Wear, Lois LaCivita Nixon, 1994-07-01 This book shows how imaginative literature brings women's medical experiences back to lived moments in living bodies where readers can perhaps better understand what it feels like to be someone else The authors provide four sections that discuss birth abortion miscarriage and fertility breast cancer middle age menopause and hysterectomy and aging While the focus is on twentieth century North American women a particular emphasis is placed on the diversity of women's experiences within that time and culture

Demystifying Love Stephen B. Levine, 2013-05-13 Intended primarily for mental health professionals *Demystifying Love* deals plainly with topics rarely written about for clinicians The book discusses in a small package highly readable and useful topics such as love as both noun and verb psychological intimacy sexual desire as well as infidelity both in background concepts and clinical guidelines As the book shows love is the logical point of departure for a clinical understanding of sexuality and its problems It is the most conventional framework for understanding sexual behaviors the one that is broadly endorsed across many cultures often as the ideal context for sexual expression The book integrates an analysis of love in patients dealing with intimacy sexual desire infidelity forgiveness and reconciliation Detailed with compelling case studies the author's skill as a therapist comes through in the discussion of these topics many of which are at the heart of numerous couple problems In creating this illuminating work for mental health professionals Dr Levine may have underestimated its appeal Dr Levine's ability to shed light on our internal processes as we love and attempt to be loved throughout life may prove to be of interest to a far broader audience

The Virtuous Physician James A. Marcum, 2012-01-03 Although modern medicine enjoys unprecedented success in providing excellent technical care, many patients are dissatisfied with the poor quality of care or the unprofessional manner in which physicians sometimes deliver it Recently, this patient dissatisfaction has led to quality of care and professionalism crises in medicine In this book, the author proposes a notion of virtuous physician to address these crises He discusses the nature of the two crises and efforts by the medical profession to resolve them and then he briefly introduces the notion of virtuous physician and outlines its basic features Further, virtue theory is discussed along with virtue ethics and virtue epistemology and specific virtues especially as they relate to medicine The author also explores the ontological priority of caring as the metaphysical virtue for grounding the notion of virtuous physician and two essential ontic virtues: care and competence In addition to this, he examines the transformation of competence into prudent wisdom and care into personal radical love to forge the compound virtue of prudent love which is sufficient for defining the virtuous physician Lastly, two clinical case stories are reconstructed which illustrate the various virtues associated with medical practice and it is discussed how the notion of virtuous physician addresses the quality of care and professionalism crises

Will You Love a Depressed Person? Abraham Reymond, 2025-07-23 What if the one you loved most pulled away in silence? What if they couldn't smile back? Would you still stay? This piercing collection of poems is a cry from the shadows where depression, faith and love collide Reymond writes from within the ache, not outside it With every line, he invites you to see the sacred behind the sorrow and the tenderness still alive inside the numbness It is a book for the ones who stayed And for the ones who couldn't It is for the depressed soul who wonders if love can outlast the silence And for the one asking, Can I keep loving someone who no longer loves life Rooted in Christian truth but wide enough for all who wrestle with despair, this is not a self-help book; it is a soul echo A gospel whispered in the dark A question that waits for an answer I'm not asking you to fix me I'm asking if you'll still hold my hand when I don't have the strength to lift it
