

Prayer For Patience In God's Timing

Dear Lord

Thank you for the gift of life today.
I pray that you help me stay patient
for you. Let me hold out for the
grace you have planned for me.
Let me not hastily take my own
path or any shortcuts.

Let me remain faithfully under
your care and love. Let me not stray
unto a path of destruction.

Help me to trust in your timing
Help me stay focused on you as I
wait on your grace.

Amen

Robert L. Klitzman,Professor of Psychiatry and Co-Founder of the Center for Bioethics Robert L Klitzman,2024 Psychiatrist and bioethicist Robert Klitzman here explores the need for spiritual guidance among patients and their families who are experiencing illness They often struggle to make sense of their situation and as they confront their mortality they will try to seek hope purpose and larger connections beyond the world of medicine While physicians are frequently uncomfortable with these issues often under sung hospital chaplains can and do fill this void Klitzman uses interviews with patients families and chaplains to bring their stories to life and more broadly he explores the ways in which hospitals and the health care system might address this neglect of a vital human need in times of crisis *Investigating Prayer* Ian Olver,2012-10-10 This book relates the experience of researching planning and conducting a scientific study into intercessory prayer prayer for others The purpose of the study was to ascertain whether the impact of prayer could be measured in a formal study based on the

large number of anecdotal reports of efficacy The study was a prospectively randomized double blind trial that added prayer by an established Christian prayer group to conventional therapy for cancer The unique design feature was that the primary endpoint was a change in a validated scale of spiritual well being The patients were informed that they were participating in a study about spiritual well being and quality of life but remained blinded to the intervention The initial observation from the baseline data was that spiritual well being made a unique contribution to quality of life The final outcome of the study was that there was a statistically significant difference in spiritual well being favoring the prayer group The background includes a fascinating review of the medical literature on the topic which contains positive and negative studies that each attracts a vigorous debate about methodology endpoints and whether metaphysical phenomena can or should be studied using scientific methodology The complementary and alternative medicine literature is also equivocal as to whether prayer arguably the most common complementary medical therapy should be included in the range of interventions grouped under that heading In addition to reporting the background and results of the study the book explores the reactions of a range of individuals to the trial all of which help reflect on the nature of prayer
