Art and Religion in

Eighteenth-Century Europe Nigel Aston, 2009-07-15 Eighteenth century Europe witnessed monumental upheavals in both

the Catholic and Protestant faiths and the repercussions rippled down to the churches religious art forms Nigel Aston now

chronicles here the intertwining of cultural and institutional turmoil during this pivotal century The sustained popularity of

religious art in the face of competition from increasingly prevalent secular artworks lies at the heart of this study Religious

art staked out new spaces of display in state institutions palaces and private collections the book shows as well as taking

advantage of patronage from monarchs such as Louis XIV and George III who funded religious art in an effort to enhance

their monarchical prestige Aston also explores the motivations and exhibition practices of private collectors and analyzes

changing Catholic and Protestant attitudes toward art The book also examines purchases made by corporate patrons such as

charity hospitals and religious confraternities and considers what this reveals about the changing religiosity of the era as

well An in depth historical study Art and Religion in Eighteenth Century Europe will be essential for art history and religious

studies scholars alike **"Striking Images, Iconoclasm Past and Present "** Stacy Boldrick, 2017-07-05 All cultures make

and break images Striking Images Iconoclasm Past and Present explores how and why people have made and modified

images and other cultural material from pre history into the 21st century With its impressive chronological sweep and

disciplinary breadth this is the first book about iconoclasm the breaking of images and the transformation of broader sets of

signs that includes contributions from archaeologists curators and museum conservators as well as historians of art literature

and religious studies The chapters examine themes critical to the study of iconoclasm violence punishment memory

intentionality ruins and relics and their survival The conclusion shows how cross disciplinary debate amongst the

contributors informed Tate Britain's Art under Attack exhibition 2013 and addresses the challenges iconoclasm presents to

the modern museum By juxtaposing objects and places usually considered in isolation Striking Images raises provocative

questions about our understandings of cross cultural differences and the value of representational objects from the broken

swords of pre historical bog graves to the Bamiyan Buddhas and contemporary art Are any such objects ever finished or are they simply subject to constant transformation In dialogue with each other the essays consider this question and expand the field of iconoclasm and cultural studies

The Shadow Drawing Francesca Fiorani, 2020-11-17 Insightful and beautiful A wonderful study of how Leonardo's art and science are interwoven Walter Isaacson author of Leonardo Da Vinci A New York Times Book Review Editors Choice Shortly after Leonardo da Vinci's death his peers and rivals created the myth of the two Leonardos there was Leonardo the artist and then later in life Leonardo the scientist In this pathbreaking biographical interpretation the art historian Francesca Fiorani tells a very different and much more interesting story Taking a fresh look at Leonardo's celebrated but challenging notebooks and other sources Fiorani shows that Leonardo became fluent in science when he was still young man As an apprentice in a Florence studio he was especially interested in the science of optics He aspired to use this knowledge to capture as no artist before him had ever done the interior lives of his subjects to paint the human soul in its smallest tenderest motions and vicissitudes And then he hoped to take one further step to gather his scientific knowledge together in a book that would be even more important than his paintings In *The Shadow Drawing* Fiorani revises our understanding of Leonardo the artist's most renowned paintings and reconstructs the wisdom Leonardo the author hoped to impart The result is both a stirring biography and a bold reconsideration of how the Renaissance understood science and art and of what was lost when the two were sundered Fiorani's lively intellectual adventure gives us new understanding and appreciation of Leonardo's cross fertilization of art and science It is a perceptive biography of Leonardo exploring the frontiers of science but also a brilliantly informative guide to his paintings Ross King author of Brunelleschi's Dome Leonardo and the Last Supper and Mad Enchantment *Artful Armies, Beautiful Battles* Pia F. Cuneo, 2021-12-28 Warfare and the circumstances surrounding it have often provided important impulses for cultural production This book explores the relationship between warfare and image making in the early modern period Rather than dealing with images simply as reproductions of actual events the volume demonstrates complex processes by which political national and social identities are negotiated and fashioned in warfare imagery The book analyses three main issues the impact of war on art the ways in which warfare imagery supports dominant ideologies and the manner in which such imagery also constructs alternative identities The essays offer a broad range of methodologies while dealing with a wide array of chronological geographical and artistic materials Historians and art historians will find this volume particularly useful in its nuanced examination of the relationship between art and history

William Etty Leonard Robinson, 2007 The historical and cultural backdrop for Etty's life and works is studied throughout the book Chapters detail his studies in Italy and France his career as a painter his work with the York School of Design in the final decade of his life his place in the fine arts market and his emulators are described Provided by publisher *Women Patrons and Collectors* Andrea M. Gáldy, 2011-10-18 In looking at the history of collecting one may be excused for regarding it as an activity in which traditionally women have

shown little interest or in which they have not been involved As the present volume shows women particularly aristocratic women not only resisted this discrimination through the ages but also built important collections and used them to their own advantage in order to make statements about their lineage power cultural heritage or religious preferences That is not to say that there was not an increasing number of middle class women who became draughtswomen painters and natural scientists and who found it equally beneficial for their chosen profession to collect In every case the female collector chose to collect and what to collect she chose how and where to present the collection and she also decided when to dispose of objects thereby occasionally taking on a curatorial role Women have been seen as gatherers of furnishings jewellery dress and objects of domestic life This third volume in the Collecting it thus seeks to give a voice to a group of important female collectors from the sixteenth to the early nineteenth century whose importance for the history of collecting has not yet or not sufficiently been acknowledged
