Paving Wall Street Experimental Economics And The Quest For The Perfect Market:

Paving Wall Street Ross M. Miller, 2002 Praise for *Paving Wall Street* This is a remarkable book that weaves the deep scientific roots of modern finance and modern financial institutions with humorous perspective and considerable wisdom Few understand the pervasive and complex economic principles that govern our world of finance Few are aware of the academic and scientific origins of financial practices and market instruments that are commonplace today Ross Miller uses his experience and talents acquired as an experimental economist to help us understand a world that is contradictory potentially dangerous and paradoxical He entertains us while doing it Charles R Plott Edward S Harkness Professor of Economics and Political Science California Institute of Technology Decisions by millions of individuals produce the fierce tides and churning seas of Wall Street Miller wields his microscope in the laboratory of experimental economics to provide a sprightly and insightful analysis of investor behavior Richard Zeckhauser Frank P Ramsey Professor of Political Economy John F Kennedy School of Government Harvard University Dramatic new ways for buying and selling spectrum auctions e commerce derivatives are the economics profession s contribution to the Information Revolution This book explains how many of these innovations began with simple experiments at Caltech The style is a refreshing combination dramatic and fun to read but also historically and scientifically accurate So I can send one to my Dad a salesman and another to my girlfriend a patent attorney Colin Camerer Rea and Lela Axline Professor of Business Economics California Institute of Technology *Paving Wall Street* is a first rate insight into bubbles and the experimental research performed on the topic by leading academicians such as Vernon Smith David Dreman Chairman Dreman Value Management Academic ideas have revolutionized how Wall Street operates Entirely new markets have been created This revolution continues today accelerated by the rise of increasingly automated markets Ross Miller has produced a book that makes the leading edge financial and economic thinking that shapes these new markets accessible to practitioners and professionals With no equations and a deft touch this is an excellent guide to the future of greater Wall Street David J Leinweber PhD Economics Social Sciences California Institute of Technology

A Life of Experimental Economics, Volume II Vernon L. Smith, 2018-11-23 This sequel to *A Life of Experimental Economics* Volume I continues the intimate history of Vernon Smith s personal and professional maturation after a dozen years at Purdue The scene now shifts to twenty six transformative years at the University of Arizona then to George Mason University and his recognition by the Nobel Prize Committee in 2002 The book ends with his most recent decade at Chapman University At Arizona Vernon and his students studied asset trading markets and learned how wrong it had been to suppose that price bubbles could not occur where markets were full information transparent Their work in computerization of the lab facilitated very complex supply and demand experiments in natural gas pipeline communication and electricity markets that paved the way for implementing through decentralized market processes the liberalization of industries traditionally believed to be natural monopolies The Smart Computer Assisted Market was born Smith s move to George Mason University greatly

facilitated government and industry work in tandem with various public and private entities whereas his relocation to Chapman University coincided with the Great Recession whose similarity with the Depression was evident in his research. There he integrated two fundamental kinds of markets with laboratory experiments: Consumer non durables, the supply and demand for which was stable in the lab and in the economy; and durable assets whose bubble tendencies made them unstable in the lab as well as in the economy, witness the great housing mortgage market bubble run up of 1997-2007. This book's conversational style and emphasis on the backstory of published research accomplishments allows readers an exclusive peak into how and why economists pursue their work. It's a must read for those interested in experimental economics, the housing crisis, and economic history.

The Methodology of Experimental Economics Francesco Guala, 2005-08-01. The experimental approach in economics is a driving force behind some of the most exciting developments in the field. The experimental revolution was based on a series of bold philosophical premises which have remained until now mostly unexplored. This book provides the first comprehensive analysis and critical discussion of the methodology of experimental economics, written by a philosopher of science with expertise in the field. It outlines the fundamental principles of experimental inference in order to investigate their power, scope, and limitations. The author demonstrates that experimental economists have a lot to gain by discussing openly the philosophical principles that guide their work, and that philosophers of science have a lot to learn from their ingenious techniques devised by experimenters in order to tackle difficult scientific problems.

Do Economists Make Markets? Donald MacKenzie, Fabian Muniesa, Siu Leung-Sea, 2020-06-30. Around the globe, economists affect markets by saying what markets are doing, what they should do, and what they will do. Increasingly, experimental economists are even designing real-world markets. But despite these facts, economists are still largely thought of as scientists who merely observe markets from the outside, like astronomers look at the stars. *Do Economists Make Markets* boldly challenges this view. It is the first book dedicated to the controversial question of whether economics is performative, or whether in some cases economics actually produces the phenomena it analyzes. The book's case studies, including financial derivatives markets,

telecommunications frequency auctions, and individual transferable quotas in fisheries, give substance to the notion of the performativity of economics in an accessible, nontechnical way. Some chapters defend the notion; others attack it vigorously. The book ends with an extended chapter in which Michel Callon, the idea's main formulator, reflects upon the debate and asks what it means to say economics is performative. The book's insights and strong claims about the ways economics is entangled with the markets it studies should interest and provoke economic sociologists, economists, and other social scientists. In addition to the editors, Callon, the contributors include Marie France Garcia Parpet, Francesco Guala, Emmanuel Didier, Philip Mirowski, Edward Nik Khah, Petter Holm, Vincent Antonin, L. Pinay, and Timothy Mitchell.

Handbook of Computational Economics Leigh Tesfatsion, Kenneth L. Judd, 2006-05-15. The explosive growth in computational power over the past several decades offers new tools and opportunities for economists. This handbook volume surveys recent research on Agent-based

Computational Economics ACE the computational study of economic processes modeled as dynamic systems of interacting agents Empirical referents for agents in ACE models can range from individuals or social groups with learning capabilities to physical world features with no cognitive function Topics covered include learning empirical validation network economics social dynamics financial markets innovation and technological change organizations market design automated markets and trading agents political economy social ecological systems computational laboratory development and general methodological issues Every volume contains contributions from leading researchers Each Handbook presents an accurate self contained survey of a particular topic The series provides comprehensive and accessible surveys

Philosophy of Economics Uskali Mäki, 2012-06-12 Part of the Handbook of the Philosophy of Science Series edited by Dov M Gabbay King's College London UK Paul Thagard University of Waterloo Canada and John Woods University of British Columbia Canada Philosophy of Economics investigates the foundational concepts and methods of economics the social science that analyzes the production distribution and consumption of goods and services This groundbreaking collection the most thorough treatment of the philosophy of economics ever published brings together philosophers scientists and historians to map out the central topics in the field The articles are divided into two groups Chapters in the first group deal with various philosophical issues characteristic of economics in general including realism and Lakatos explanation and testing modeling and mathematics political ideology and feminist epistemology Chapters in the second group discuss particular methods theories and branches of economics including forecasting and measurement econometrics and experimentation rational choice and agency issues game theory and social choice behavioral economics and public choice geographical economics and evolutionary economics and finally the economics of scientific knowledge This volume serves as a detailed introduction for those new to the field as well as a rich source of new insights and potential research agendas for those already engaged with the philosophy of economics Provides a bridge between philosophy and current scientific findings Encourages multi disciplinary dialogue Covers theory and applications

Real-World Decision Making Morris Altman, 2015-06-23 The first and only encyclopedia to focus on the economic and financial behaviors of consumers investors and organizations including an exploration of how people make good and bad economic decisions Traditional economic theories speculate how and when people should spend money But consumers don't always behave as expected and often adopt strategies that might appear unorthodox yet are at times more effective than the rule prescribed by conventional wisdom This groundbreaking text examines the ways in which people make financial decisions whether it is because they are smart but atypical in their choices or just irrational decision makers A leading authority on behavioral economics Morris Altman and more than 150 expert contributors delve into key concepts in behavioral economics economic psychology behavioral finance neuroeconomics experimental economics and institutional economics to help inform economic models based on reality not theory Through 250 informative entries the book explores various aspects of the subject including decision making economic analysis and public

policy In addition to introducing concepts to readers new to the subject the book sheds light on more advanced financial topics in a manner that is objective comprehensive and accessible An Engine, Not a Camera Donald

MacKenzie,2008-08-29 In An Engine Not a Camera Donald MacKenzie argues that the emergence of modern economic theories of finance affected financial markets in fundamental ways These new Nobel Prize winning theories based on elegant mathematical models of markets were not simply external analyses but intrinsic parts of economic processes Paraphrasing Milton Friedman MacKenzie says that economic models are an engine of inquiry rather than a camera to reproduce empirical facts More than that the emergence of an authoritative theory of financial markets altered those markets fundamentally For example in 1970 there was almost no trading in financial derivatives such as futures By June of 2004 derivatives contracts totaling 273 trillion were outstanding worldwide MacKenzie suggests that this growth could never have happened without the development of theories that gave derivatives legitimacy and explained their complexities MacKenzie examines the role played by finance theory in the two most serious crises to hit the world s financial markets in recent years the stock market crash of 1987 and the market turmoil that engulfed the hedge fund Long Term Capital Management in 1998 He also looks at finance theory that is somewhat beyond the mainstream chaos theorist Benoit Mandelbrot s model of wild randomness MacKenzie s pioneering work in the social studies of finance will interest anyone who wants to understand how America s financial markets have grown into their current form **Institutional Money Management** David M.
