Evans,2022-07-14 This is the thrilling story of USS Enterprise CVN 65 the world s first nuclear powered aircraft carrier Her story spans 51 years 1961 2012 of active service from the brink of nuclear war during the Cuban Missile Crisis to the first global cruise by nuclear powered ships to the first strikes during the Vietnam War battles against the Iranians and Iraqis in the 1980s and 1990s a pivotal role during 9 11 and the Global War on Terrorism and hunting pirates off the Horn of Africa More than just an operational history of Enterprise this book recounts the experiences of the men and women who served on board the pilots who flew from the flight deck the men who fought to save the ship during a fire in 1969 the sailors who brought retribution against Al Qaeda terrorists with detailed descriptions of sorties through flak filled skies and harrowing escapes from capture behind enemy lines This book is dedicated to the men and women who have served on board Big E and to those who paid the ultimate price for freedom Tiger Check Steven A. Fino,2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided

missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino s Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force s most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace
