Den Ärzten sollen Möglichkeiten aufgezeigt werden, anhand der Untersuchung genetischer Dispositionen von Patienten die Arzneimittelwirksamkeit zu optimieren und unerwünschte Arzneimittelwirkungen und Interaktionen zu minimieren. Jahrbuch der Bayerischen Akademie der Wissenschaften

Bayerische Akademie der Wissenschaften, 1987. Pharmaceuticals in the Environment Klaus Kümmerer, 2008-10-10. When the first green wave appeared in the mid and late 1960s it was considered a feasible task to solve pollution problems. The visible problems were mostly limited to point sources and a comprehensive end-of-the-pipe technology. Environmental technology was available. It was even seriously discussed in the US that what was called zero discharge could be attained by 1985. It became clear in the early 1970s that zero discharge would be too expensive and that we should also rely on the self-purification ability of ecosystems. That called for the development of environmental and ecological models to assess the self-purification capacity of ecosystems and to set up emission standards considering the relationship between impacts and effects in the ecosystems. This idea is illustrated in Fig. 0.1. A model is used to relate an emission to its effect on the ecosystem and its components. The relationship is applied to select a good solution to environmental problems by application of environmental technology.

Human Enhancements und Patentrecht Sven Vetter, 2024-09-12. Ist das Patentrecht wirklich wertneutral oder gar ethisch blind? Die Praxis des Patentrechts wird von einem ungebrochenen Fortschrittsoptimismus getragen. Das hohe Mass an Technik und Innovationsglaube lässt traditionell wenig Raum für eine tiefergehende Reflexion ausserrechtlicher Wirkdimensionen des Patentsystems. Es stellt sich jedoch die Frage, ob Innovationsförderung ohne ein Mindestmass an gesellschaftlicher Innovationsverantwortung überhaupt ein sinnvolles Ziel sein kann. Ein so facettenreiches Forschungsthema wie Human Enhancements eignet sich hervorragend dazu, um die Funktionen und Wirkungen des Patentschutzes zu veranschaulichen. An die Stelle eines allgemeinen Verweises auf ethisch umstrittene Forschungsfelder treten konkrete Beispiele. Die gewonnenen Erkenntnisse können wiederum in den interdisziplinären Gesamtdiskurs einfließen, der die

biotechnische Selbstgestaltung des Menschen als Teil und Folge der modernen Gesellschaft und ihrer Charakteristika betrachtet Die Arbeit wurde mit dem Innovationspreis 2023 der Humboldt Universität zu Berlin und als beste Dissertation im Zivilrecht mit dem Promotionspreis 2023 der Juristischen Fakultät der Humboldt Universität zu Berlin ausgezeichnet
