The Discourse of Character Education Peter Smagorinsky, Joel Taxel, 2005-05-06 In this book Peter Smagorinsky and Joel Taxel analyze the ways in which the perennial issue of character education has been articulated in the United States both historically and in the current character education movement that began in earnest in the 1990s The goal is to uncover the ideological nature of different conceptions of character education The authors show how the current discourses are a continuation of discourse streams through which character education and the national purpose have been debated for hundreds of years most recently in what are known as the Culture Wars the intense often passionate debates about morality culture and values carried out by politicians religious groups social policy foundations and a wide range of political commentators and citizens in which the various stakeholders have sought influence over a wide range of social and economic issues including education The centerpiece is a discourse analysis of proposals funded by the United States Department of Education's Office of Educational Research and Improvement OERI Discourse profiles from sets of states that exhibit two distinct conceptions of character are examined and the documents from particular states are placed in dialogue with the OERI Request for Proposals One profile reflects the dominant perspective promoted in the U S based on an authoritarian view in which young people are indoctrinated into the value system of presumably virtuous adults through didactic instruction The other reflects the well established yet currently marginal discourse emphasizing attention to the whole environment in which character is developed and enacted and in which reflection on morality rather than didactic instruction in morality is the primary instructional approach By focusing on these two distinct regions and their conceptions of character the authors situate the character education movement at the turn of the twenty first century in the context of historical notions about the nature of character and regional conceptions regarding the nature of societal organization This enlightening volume is relevant to scholars practitioners policymakers and students across the field of education particularly those involved in character education moral development discourse analysis history and cultural foundations of education and related fields and to the wider public interested in character education

Reading-Writing Connections Mary F. Heller, 1999-04-01. Reading Writing Connections: From Theory to Practice is an extraordinary language arts methods text that enables elementary and middle school teachers to create classroom environments where all students can become lifelong readers and writers. Focusing on developmentally appropriate methods and materials, this remarkably readable book empowers a new generation of teachers to integrate reading, writing, listening, and speaking in K-8 classrooms. Heller's highly accessible writing style makes this book suitable as a primary text for undergraduate and graduate courses in language arts, reading, writing, and literacy. Special features of this second edition include a vision of how to transform cutting-edge theory and research into classroom practice that utilizes integrated language arts instruction; a unique developmental perspective with separate chapters on teaching methods and materials for kindergarten, primary 1-3, intermediate 4-6, and middle grades 7-8; instructional guidelines that offer generous, detailed suggestions for applying theory to practice; plus "For You to Try" and "For Your Journal" exercises that encourage critical thinking and reflection; and a wealth of classroom vignettes, examples of students' oral and written language, illustrations, and figures that accentuate interesting and informative theory, research, and practice. In addition, Reading Writing Connections offers expanded content on the impact of sociocultural theory and the whole language movement on the teaching of reading and writing; greater emphasis on cultural diversity, including new multicultural children's literature booklists that complement the general children's literature bibliographies; and current information on alternative assessment, emerging technologies, the multiage classroom, reader response to literature, and thematic teaching.
