Manual of Deixis in Romance Languages Konstanze Jungbluth,Federica Da Milano,2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and

authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world     *The Oxford History of Romanian Morphology* Martin Maiden,Adina Dragomirescu,Gabriela Pană Dindelegan,Rodica Zafiu,2021 This book offers the first comprehensive account of the development of the complex morphological system of Romanian It shows how the controversial origins of many of the distinctive morphological features of the language have important implications for broader historical Romance linguistics and indeed for morphological theory more generally     *The Phonetics and Phonology of Contrast* Margaret E. L. Renwick,2014-09-12 This book proposes that phonological contrast in particular the robustness of a phonemic contrast does not depend solely on the presence of minimal pairs but is instead affected by a set of phonetic usage based and systemic factors This perspective opens phonology to a more direct interpretation through phonetic analysis undertaken in a series of case studies on the Romanian vowel system Both the synchronic phonetics and morpho phonological alternations are studied to understand the forces that have historically shaped and now maintain the phonemic system of Romanian A corpus study of phoneme type frequency in Romanian reveals marginal contrasts among vowels in which a sharp distinction between allophones and phonemes fails to capture relationships among sounds An investigation of Romanian provides insight into the historical roots of marginal contrast and a large acoustic study of Romanian vowels and diphthongs is a backdrop for evaluating the phonetic and perceptual realization of marginal contrast The results provide impetus for a model in which phonology phonetics morphology and perception interact in a multidimensional way     *Articles about the Ethnical and the National Secret Political Organizations (Second Edition)* Istvan Adorjan,2020-09-28 Foreword With my this book i publish my relatively short writings representing my ideas and conceptions about the global Illuminati and the ethnical and the national Illuminatis or as i termed them the ethnical and the national secret political organizations which i have not processed up to the size of a book     **Reviews of National Policies for Education: South Eastern Europe 2003 Volume 2: FYROM, Moldova, Montenegro, Romania, Serbia** OECD,2003-12-02 Educational work is a key element for both human capital formation and the promotion of peace and democratic values It has therefore been identified as one of the priorities of the Stability Pact The OECD was asked to be Co ordinator for General     **The Diachrony of Differential Object Marking in Romanian** Virginia Hill,Alexandru Mardale,2021-06-15 This book provides a comprehensive investigation of the origins development and stabilization of differential object marking DOM in Romanian DOM a means by which a grammar distinguishes between objects based on semantic features such as animacy or definiteness has been a fruitful area of research in syntax historical linguistics and typology In this volume Virginia Hill and Alexandru Mardale demonstrate that Romanian DOM reflects a typological mix of Balkan and Romance patterns and is in fact composed of three distinct mechanisms Their analysis of these mechanisms reveals that DOM triggers in Romanian are located in the nominal domain in contrast to languages such as Spanish where they are located in the verbal domain The

cross linguistic perspective adopted in the volume sheds light on existing typologies of DOM particularly in relation to the variation observed in the merging location of the DOM particle and of the doubling pronominal clitic

**The Making of Modern Romanian Culture** Alex Drace-Francis, 2005-11-23 How do literacy and the development of literary culture promote the development of a national identity This well researched and readable book explores the rise of Romanian language literary educational and printing institutions in the eighteenth and nineteenth centuries bringing out a story that has not been fully explored in English In twenty concise yet scholarly chapters Alex Drace Francis builds on and engages with current knowledge about print culture modernization national identity and state formation to make an original contribution to ongoing debates in these areas
