Conference on Statistical Science Honouring the Bicentennial of Stefano Frascini's Birth Carlo

Malaguerra, Stephan Morgenthaller, Elvezio Ronchetti, 2012-12-06 The Conference on Statistical Science held in Monte Verita Switzerland on 18-20 November 1996 was intended to honour the memory of Stefano Frascini at the occasion of the bicentennial of his birth 1796-1996. It was jointly organized by the Swiss Federal Institute of Technology in Lausanne, the Swiss Federal Statistical Office and the University of Geneva. These proceedings gather a selected collection of contributions presented by statisticians from universities, research institutes and national statistical services of Europe, North America and Asia. Part I focuses on a historical appreciation of Stefano Frascini's life and work. Authors develop a deep analysis of the historical context, the political action, the scientific achievement and the intellectual legacy of the founding father of Swiss official statistics. The reader thus has an opportunity to appreciate the various facets of this exceptional man who not only drew the first comprehensive statistical portrait of Switzerland but also established the foundations for modern educational and political institutions. Part II groups papers on the relationship between statistical science and official statistics. Authors analyse the historical background, current context and new perspectives of co-operation between scientific research and official statistical services. They show how the relationship between both partners has evolved over the past decades, stressing certain prerequisites and opportunities for effective and rigorous interaction between academia's scientific activity and the production of statistical information.

Sample Surveys: Design, Methods and Applications, 2009-08-31

This new handbook contains the most comprehensive account of sample surveys theory and practice to date. It is a second volume on sample surveys with the goal of updating and extending the sampling volume published as volume 6 of the Handbook of Statistics in 1988. The present handbook is divided into two volumes, 29A and 29B, with a total of 41 chapters covering current developments in almost every aspect of sample surveys with references to important contributions and available software. It can serve as a self-contained guide to researchers and practitioners with appropriate balance between theory and real-life applications. Each of the two volumes is divided into three parts with each part preceded by an introduction summarizing the main developments in the areas covered in that part. Volume 29A deals with methods of sample selection and data processing with the later including editing and imputation, handling of outliers and measurement errors and methods of disclosure control. The volume contains also a large variety of applications in specialized areas such as household and business surveys, marketing research, opinion polls and censuses. Volume 29B is concerned with inference, distinguishing between design-based and model-based methods and focusing on specific problems such as small area estimation, analysis of longitudinal data, categorical data analysis and inference on distribution functions. The volume contains also chapters dealing with case-control studies, asymptotic properties of estimators and decision-theoretic aspects. Comprehensive account of recent developments in sample survey theory and practice. Discusses a wide variety of diverse applications. Comprehensive bibliography.

a Difference: Volume I and II Sasha A. Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T. Hickey, 2017-09-05 William Wordsworth 1770 1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth s later poems comparing his work with that of his regional contemporaries as well as major writers such as Scott The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth s construction of community and his use of power relationships A serious discussion of the place of sexual feeling in his writing is also included **Forthcoming Books**
