Roots Of German Nationalism:

Roots of German Nationalism Louis Leo Snyder,1978 *From Bismarck to Hitler* Dr. Louis L. Snyder,2017-02-07 It is a most unusual picture that meets our eyes varying in color from the black and white of ultra conservative traditional nationalism to the red of radicalism and the black and red of national socialism The Germany of 1862 1935 has known every array of nationalism from the Jacobin variety through humanitarian nationalism and passionate Hitlerite super nationalism It is our purpose to clarify this background to show on what foundation modern integral nationalism rests The task of selecting the most important elements from this distorted picture is an extremely difficult one but the attempt at least must be made

The Wars of German Unification 1864 - 1871 William Carr,Harry Hearder,2014-06-06 In his last book the late William Carr provides a masterly account of the origins and impact of the three major wars fought by Prussia in creating the Bismarckian Reich of 1871 He begins with a study of the development of nationalism and liberalism from the late eighteenth century to the 1860 s before turning to a detailed examination of the Schleswig Holstein Conflict of 1864 the Six Weeks War of 1866 and the Franco Prussia War of 1870 71 **The Making of a Nation** Heidi Parry,1994 [A Short History of German Philosophy](#) Vittorio Hösle,2018-12-04 The story of German philosophy from the Middle Ages to today In an accessible narrative that explains complex ideas in clear language Vittorio Hösle traces the evolution of German philosophy and describes its central influence on other aspects of German culture including literature politics and science from the Middle Ages to today A Short History of German Philosophy addresses the philosophical changes brought about by Luther s Reformation and then presents a detailed account of German philosophy from Leibniz to Kant the rise of a new form of humanities and the German Idealists The following chapters investigate the collapse of the German synthesis in Schopenhauer Marx and Nietzsche Turning to the twentieth century the book explores the rise of analytical philosophy the foundation of the historical sciences Husserl s phenomenology and its radical alteration by Heidegger the Nazi philosophers Gehlen and Schmitt and the main West German philosophers after 1945 Arguing that there was a distinctive German philosophical tradition from the mid eighteenth century to the mid twentieth century the book closes by examining why that tradition largely ended in the recent past A philosophical history remarkable for its scope brevity and lucidity this is an invaluable book for students of philosophy and anyone interested in German intellectual and cultural history [Ethnic Minorities in 19th and 20th Century Germany](#) Panikos Panayi,2014-06-11 This is the first book to trace the history of all ethnic minorities in Germany during the nineteenth and twentieth centuries It argues that all of the different types of states in Germany since 1800 have displayed some level of hostility towards ethnic minorities While this reached its peak under the Nazis the book suggests a continuity of intolerance towards ethnic minorities from 1800 that continued into the Federal Republic During this long period German states were home to three different types of ethnic minorities in the form of dispersed Jews and Gypsies localised minorities such as Serbs Poles and Danes and immigrants from the 1880s Taking a

chronological approach that runs into the new Millennium the author traces the history of all of these ethnic groups illustrating their relationship with the German government and with the rest of the German populace He demonstrates that Germany provides a perfect testing ground for examining how different forms of rule deal with minorities including monarchy liberal democracy fascism and communism The Russia's Black Sun: The Occult Roots of Eurasianism Cristian Derosa,2025-01-02 The world lives under the siege of two great beasts on the one hand globalism proponent of an apparently secular and worldly universal religion representing the demonic lie that disguises itself as pacifism human rights and tolerance to practice cultural genocide and domination tyrannical over life and death through the transhumanist monster of total control On the other side traditions emerge gathered under the umbrella of multipolarity led by Russian Eurasianism as a congregation of universal traditions against modern materialism This last current which is the object of this work hides in the form of an apparent opposition to globalist materialism a declaration of war on the West as a civilization considered by occultists of recent centuries as the civilization of the world Logos against which proposes chaos liberation a type of awakening and openness to knowledge as an alternative to the Enlightenment mentality of modernity For this reason it opposes modernity through both traditionalism and postmodernism Both currents globalist and traditionalist consider themselves bearers of light against darkness just like European revolutionaries in the past both in the form of Protestants and Freemasons seen by themselves as symbols of a metaphysical freedom that manifests itself in different ways While globalists propose political individual and hedonistic freedom Eurasians claim to be spiritual liberators of the lights of a new awakening of traditions *The Oxford History of Modern German Theology, Volume 1: 1781-1848* Grant Kaplan,Kevin M. Vander Schel,2023 Oxford History of Modern German Theology Vol I 1781 1848 offers a multi author overview of the development of modern German theology from 1781 to 1848 Across 36 chapters Kaplan and Vander Schel underline important movements in German theology during this period and highlight unresolved questions which have shaped subsequent discussion *The Kingdom of Württemberg and the Making of Germany, 1815-1871* Bodie A. Ashton,2017-01-12 CHOICE Outstanding Academic Title 2017 This book examines the 1871 unification of Germany through the prism of one of its forgotten states the Kingdom of W rttemberg It moves beyond the traditional argument for the importance of the great powers of Austria and Prussia in controlling German destiny at this time Bodie A Ashton champions the significance of W rttemberg and as a result all 38 German states in the unification process noting that each had their own institutions and traditions that proved vital to the eventual shape of German unity The Kingdom of W rttemberg and the Making of Germany 1815 1871 demonstrates that the state s government was dynamic and in full control of its own policy making throughout most of the 19th century with Ashton showing a keen appreciation for the state s domestic development during the period The book traces W rttemberg s strong involvement in the national question and how successive governments and monarchs in the state s capital of Stuttgart manoeuvred the country so as to gain the greatest advantage It successfully argues that the

shape of German unification was not inevitable and was in fact driven largely by the desires of the Mittelstaaten rather than the great powers the eventual Reichsgründung of January 1871 was merely the final step in a long series of negotiations diplomatic manoeuvres and subterfuge with Württemberg playing a vital regional role Making use of a wealth of primary sources including telegrams newspaper articles diary entries letters and government documents this is a vitally important study for all scholars and students of 19th century Germany

Homelands Nadav G. Shelef,2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation's homeland whereas in other places conflict continues despite or even because of division of territory In *Homelands* Nadav G Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict *Homelands* also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations
