## Roots Of Identity:

**The Roots of Identity** Patricia Elton Mayo, 1974      Roots of Identity Linda King, 2022      **Roots of Identity** Patrick Herron, 1993      Edouard Glissant and Postcolonial Theory Celia Britton, 1999

Edouard Glissant has written extensively in French about the colonial experience in the Caribbean. Since he is known primarily as a novelist and poet, his theoretical essays have so far remained largely unread by the English language theorists in this field. This book situates Glissant within ongoing debates in postcolonial theory, making illuminating connections between his work and that of Frantz Fanon, Gayatri Spivak, Homi Bhabha, and Henry Louis Gates Jr. Focusing on language and subjectivity, *Edouard Glissant and Postcolonial Theory* moves between an analysis of Glissant's theoretical work and detailed readings of his novels to elucidate a network of related issues. Celia Britton addresses the major themes central to his writing: the reappropriation of history, standard and vernacular language, hybridity, subalternity, the problematizing of identity, and the colonial construction of the Other, and asks provocative questions relating to each: How does the colonized subject relate to a language initially imposed by the colonizer but subsequently to some extent subverted and reappropriated? How does this strategic use of language come to function as a crucial mode of cultural resistance? What role can fictional representation play in this process? This book represents the first presentation of Glissant's incisive theoretical work and analysis of his immensely powerful and subtle novels in the context of postcolonial studies. By juxtaposing them, Britton illuminates the significant contribution Glissant has made to this theoretical endeavor.

**Self-Sovereign Identity** Alex Preukschat, Drummond Reed, 2021-08-10

In *Self Sovereign Identity*, Decentralized digital identity and verifiable credentials, you'll learn how SSI empowers us to receive digitally signed credentials, store them in private wallets, and securely prove our online identities.

**Summary:** In a world of changing privacy regulations, identity theft, and online anonymity, identity is a precious and complex concept. Self Sovereign Identity (SSI) is a set of technologies that move control of digital identity from third-party identity providers directly to individuals, and it promises to be one of the most important trends for the coming decades.

Personal data experts Drummond Reed and Alex Preukschat lay out a roadmap for a future of personal sovereignty powered by the Blockchain and cryptography. Cutting through technical jargon with dozens of practical cases, it presents a clear and compelling argument for why SSI is a paradigm shift and how you can be ready to be prepared for it.

About the technology: Trust on the internet is at an all-time low. Large corporations and institutions control our personal data because we've never had a simple, safe, strong way to prove who we are online. Self-sovereign identity (SSI) changes all that.

About the book: In *Self Sovereign Identity*, Decentralized digital identity and verifiable credentials, you'll learn how SSI empowers us to receive digitally signed credentials, store them in private wallets, and securely prove our online identities. It combines a clear, jargon-free introduction to this blockchain-inspired paradigm shift with interesting essays written by its leading practitioners. Whether for property transfer, e-banking, frictionless travel, or personalized services, the SSI model for digital trust will reshape our collective future.

**Babel und Bibel 9** Leonid E. Kogan, N. Koslova, S. Loesov, S. Tishchenko, 2016-08-18 This is the ninth volume of Babel und Bibel an annual of ancient Near Eastern Old Testament and Semitic studies The principal goal of the annual is to reveal the inherent relationship between Assyriology Semitics and biblical studies a relationship that our predecessors comprehended and fruitfully explored but that is often neglected today The title Babel und Bibel is intended to point to the possibility of fruitful collaboration among the three disciplines in an effort to explore the various civilizations of the ancient Near East This volume includes as a major portion of its contents selected papers from the 6th Biannual Meeting of the International Association for Comparative Semitics Latin American Identity and Constructions of Difference Amaryll Beatrice Chanady, 1994 Required reading for those interested in Latin American identity Authors recognize difficulty of the pregnancy of the moment globalization and diaspora in which the topic is being discussed In the introduction Chanady offers an excellent historical review of the topic Essays by Enrique Dussel Jos e Rabasa see item bi 98003988 Francisco Perus and Iris Zavala are especially noteworthy Handbook of Latin American Studies v 58 *Ecophysiology of root systems-environment interaction* Boris Rewald, Omer Falik, Douglas Godbold, Shimon Rachmilevitch, 2014-09-03 There is a scarcity of detailed information regarding the ecophysiology of root systems and the way root system functioning is affected by both internal and external factors Furthermore global climate change is expected to increase the intensity of climate extremes such as severe drought heat waves and periods of heavy rainfall in addition other stresses such as salinization of soils are increasing world wide Recently an increasing awareness has developed that understanding plant traits will play a major role in breeding of future crop plants For example there is increasing evidence that the traits of root systems are defined by the properties of individual roots However further knowledge on the functional importance of root segments and the molecular physiological mechanisms underlying root system functioning and persistence is needed and would specifically allow modifying crop root system functionality and efficiency in the future Another major gap in knowledge is localized at the root soil interface and in regard to the potential adaptive plasticity of root rhizosphere interactions under abiotic stress and or competition It is currently unknown whether adaptations in microbe communities occur for example due to modified exudation rates and what are the subsequent influences on nutrient mobilization and uptake Furthermore uncovering the mechanisms by which roots perceive neighboring roots may not only contribute to our understanding of plant developmental

strategies but also has important implications on the study of competitive interactions in natural communities and in optimizing plant performance and resource use in agricultural and silvicultural systems In this Research Topic we aimed to provide an on line open access snapshot of the current state of the art of the field of root ecology and physiology with special focus on the translation of root structure to function and how root systems are influenced by interplay with internal and external factors such as abiotic stress microbes and plant plant interaction We welcomed original research papers but reviews of specific topics articles formulating opinions or describing cutting edge methods were also gladly accepted
