Long Trip The Prehistory Of Psychedelia:

The Long Trip Paul Devereux, 1997 A wide variety of psychedelics primarily plants and mushrooms have been used consistently by human societies for ritual purposes for centuries This illuminating book presents a pioneering study of the uses of psychedelic drugs from ancient times to the present Illustrations **Deeper Learning with Psychedelics** David J. Blacker, 2024-06-01 In both clinical and informal settings psychedelics users often report they have undergone something profound and even life altering Yet there persists a confounding inability to articulate just what has been imparted Informed by multidisciplinary emerging research this book provides an account of the specifically educational aspects of psychedelics and how they can render us ready to learn Drawing from indigenous peoples worldwide who typically revere these substances as plant teachers and from canonical thinkers in the western tradition such as Plato Spinoza Kant and Heidegger the author proposes an original set of categories through which to understand the educational capabilities of entheogens psychedelics with visionary qualities It emerges that entheogens real power lies not in destabilizing and decentering turning on and dropping out but as powerful aids in restoring and reenchancing our shared worlds **A Transatlantic Political Theology of Psychedelic Aesthetics** Roger K. Green, 2019-04-02 Arguing that we ought to look to psychedelic aesthetics of the 1960s in relation to current crises in liberal democracy this book emphasizes the intersection of European thought and the psychedelic The first half of the book focuses on philosophical influences of Herbert Marcuse and Antonin Artaud while the second half shifts toward literary and theoretical influences of Aldous Huxley on psychedelic aesthetics Framed within an emergent discourse of political theology it suggests that taking a postsecular approach to psychedelic aesthetics helps us understand deeper connections between aesthetics and politics **Tripping** Charles Hayes, 2000-11-01 Provides the much needed coming out of the closet that the psychedelic movement has lacked These stories will captivate inspire caution and educate This courageous book exceeds expectations Rich Doblin President Multidisciplinary Association for Psychedelic Studies MAPS A collection of transformational psychedelic experiences and a guidebook for how to understand them Flash back to a generation ago when the world of psychedelics still coasted in the gritty adventurous do it yourself ethos of Sixties counterculture Hang on for the bumpy thrill ride of the psychedelic experience before it was traded in for the white lab coat of pharmaceutical medicine Read up on the early anecdotes and field reports that have made ketamine and MDMA the newest drugs in mental health treatment In Tripping journalist Charles Hayes compiles fifty narratives of psychedelic odysseys from respectable Baby Boomers and young ravers to renowned Beat poet Anne Waldman and preeminent spokesperson Terence McKenna to give readers a glimpse into this transgressive experimental world of self discovery As he liberates psychedelics from their social stigma Hayes explores ancient Greek rites and ecstasy fueled raves sacred indigenous plants and synthetic smart drugs alien encounters and connections with nature the terrifying and the sublime A history cultural timepiece and resource guide all in one Tripping is a compendium of forbidden memories whose otherworldly

tales and expository advice will provide insight and inspiration to readers even and especially now twenty years after its original publication

Failed God John A. Rush, 2019-04-16 On a 2001 trip to the cathedrals of Europe anthropologist John Rush and his wife entered St Mark's Basilica in Venice and encountered a mosaic depicting Jesus surrounded by mushrooms with an Amanita muscaria cap in his hand Examining the space with new eyes they discovered images of mushrooms and mind altering plants all over the Basilica Intrigued Dr Rush spent seven years researching and reflecting on the profound effects hallucinogens had on the founding of all three major Western religions He concluded that Judaism Christianity and Islam are political constructions evolving out of the use of not only Amanita muscaria but a plethora of mind altering substances Failed God Fractured Myth in a Fragile World re examines the scriptural stories of Judaism Christianity and Islam as told in the Bible and Qur'an and reveals them as concocted mythical charters stemming from drug induced romps with the super natural Rush shows how mind altering substances played an instrumental role in the birth and development of Western religions and explains how they contributed to reports of prophetic experiences including angry and disturbing messages from the divine With chapters on Judaism Christianity and Islam Rush fully addresses the effects of mind altering substances on each tradition convincingly discrediting the idea that they stem from actual human interaction with the divine He also shows how an intoxicated and over zealous Apostle Paul corrupted Jesus's simple message of human decency forming an oppressive religious system based on fear In a thought provoking conclusion Rush asks how we can continue to attribute authority to traditions that were so clearly irrationally founded and incompatible with today's world

The Re-Enchantment of the West, Vol 2 Christopher Partridge,2006-06-20 Challenging some assessments of religion in the West this study argues that although much organized religion particularly Christianity is in numerical decline in actual fact we are witnessing an alternative spiritual re enchantment of society and culture *Acorns: Windows High-Tide Foghat* Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around [A Secret History of Consciousness](#) Gary Lachman,2003 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read Contents Foreword by Colin Wilson Introduction Consciousness Explained The Search for Cosmic Consciousness Esoteric
