Young Researchers Margaret Mallett, 2002-02-07 Informational kinds of reading are crucial in every lesson This book looks at how we can encourage children from the very beginning to think of themselves as young researchers using skills and strategies for clear purposes It argues that the creative practitioner nurtures children's sense of wonder and curiosity about the world and all its phenomena Packed full of advice on how to use the most stimulating and exciting texts and the liveliest approaches the book celebrates the good practice of teachers and student teachers in a large number of classroom case studies The content includes a summary of the recent developments and a framework of principles to inform good practice in this challenging aspect of literacy chapters concentrating on particular age groups beginning with the nursery and ending with the later primary years and thus taking up an essentially developmental approach an assessment of recent research and how findings can be put to practical and creative use in the classroom A central message is that children benefit from collaborating with teachers and peers at every stage of finding out The spoken language energises informational reading and writing making the sharing of the fruits of children's research highly enjoyable This book will inspire you and lead to the very best practice *The School Science Review* ,2007 Jean Piaget Bärbel Inhelder, 1982 **Assessment Reform in**

Science Benny B.H.W Yung, 2006-02-03 Fairness and Fear I was startled at the subtitle of the book when I first heard it Our series has some imaginative titles but none so evocative as this one But fear and fairness capture much of teacher thinking about assessment Indeed teachers struggle to be fair with students certainly concerned and often fearful of failures to be fair and repercussions that teachers can face as a result Then there is the fearful enterprise of imposed assessment regimes that many teachers face Dr Yung's book allows us to hear from the teachers on these concerns this is no top down policy statement His account is readable and highly instructive and I hope that copies will find their way to the desks of many

school administrators and policy personnel We are indeed pleased to release this volume William W Cobern Book Series
Editor 2000 2005 Foreword by Peter Fensham Two things are very clear to me about formal educational systems What is
assessed in these systems determines what teachers and students recognize as knowledge of worth Teachers in general are
conscientious in doing their best to ensure that their students will learn this knowledge of worth well Science has now been
widely acknowledged to be a core or key subject in the overall curriculum of schooling at all levels *El-Hi Textbooks in
