Game Theory Joachim Rosenmüller, 2013-03-09 Game Theory Stochastics Information Strategies and Cooperation provides a discussion of some relevant topics in game theory It is composed partially from material compiled by Professor Joachim Rosenmüller when lecturing at IMW the Institute of Mathematical Economics at the University of Bielefeld On the other hand it also contains research topics that are not presented in a typical game theory textbook Thus the volume may provide the basis for an advanced course in game theory simultaneously it may be called a monograph and as a third aspect it also supplies some rather elementary versions of advanced topics of the field The volume has a non cooperative and a cooperative part and in both of them the reader is assumed to have some basic knowledge in game theory for instance concerning the normal form bimatrix games Nash equilibria of the mixed extension backwards induction in games with perfect information on one hand and the coalitional function simple games convex games superadditive games the core the

Cooperative Lot Sizing Games in Supply Chains Julia Drechsel, 2010-08-18 The presented work combines two areas of research cooperative game theory and lot size optimization One of the most essential problems in cooperations is to allocate cooperative profits or costs among the partners The core is a well known method from cooperative game theory that describes efficient and stable profit cost allocations A general algorithm based on the idea of constraint generation to compute core elements for cooperative optimization problems is provided Beside its application for the classical core an extensive discussion of core variants is presented and how they can be handled with the proposed algorithm The second part of the thesis contains several cooperative lot sizing problems of different complexity that are analyzed regarding theoretical properties like monotonicity or concavity and solved with the proposed row generation algorithm to compute core elements i e determining stable and fair cost allocations
