American Book Publishing Record ,2000 **Social Sector in a Decentralized Economy** Pinaki Chakraborty,Lekha Chakraborty,Anit Mukherjee,2016-03-11 This book is an analytical examination of financing and public service delivery challenges in a decentralized framework It also provides critical insights into the effectiveness of public expenditure through benefit incidence analysis of education and healthcare services in India The benefits of decentralization always come with conflicts and trade offs By unpacking the process of decentralization the authors identify that unfunded mandates arising from the asymmetry between finances and functions at local levels are a major challenge The analysis is carried out by distilling the existing studies in this area and through an empirical investigation of public finance data at different public sector levels in India as well as in some selected developing countries Using the household survey statistics of consumption expenditure an analysis of utilization or benefit incidence of public spending on social sectors in India is achieved covering education and health sectors This title is available as Open Access on Cambridge Core **Fiscal Decentralisation and Local Level Gender Responsive Budgeting in the Philippines** Lekha S. of change is especially rapid Europe and Latin America places where health systems many themselves undergoing rapid organisational transition must find ways of adapting to an ever changing context The book begins with an historical overview recalling how humans and micro organisms have always competed at times with profound historical consequences before examining the current status of this evolutionary struggle It assesses the extent to which human societies and their governments are prepared for the challenges ahead and reviews the experiences of countries in Europe and Latin America in developing effective responses Health Systems and the Challenge of Communicable Diseases will be of interest to those engaged in the development of health policy in high and middle income countries and to those who are studying the creation and implementation of health policy *Papua and New Guinea Medical Journal* ,2006
