Unearthing St. Mary's City Henry M. Miller,Travis G. Parno,2021-05-04 This volume summarizes the remarkably diverse archaeological discoveries made during the past half century of investigations at the site of St Mary s City the first capital of Maryland and one of the earliest European settlements in America Founded in 1634 the city had disappeared by 1750 yet the archaeology documented in *Unearthing St Mary s City* reveals its untold history Contributors to this volume review new

research approaches and methods developed recently at Historic St Mary's City. They study the archaeology, architecture and people of the lively seventeenth century colonial hub. They also explore the landscapes of agriculture, enslavement and remembrance that developed at the site in the centuries after the capital's relocation to Annapolis. In their chapters, contributors delve into subjects such as soil analysis, ceramics, diet, forts, burials, plantations, state houses, tenants, tobacco, pipes, gaming and the education of women. The lands along the Chesapeake Bay have witnessed a vast range of human experiences and this book highlights the lives of peoples of European, Native American and African origins who lived on this site over a span of four centuries. Their stories illuminate the multilayered nature of this important place and the broader Chesapeake region and serve as a testament to the potential and power of historical archaeology.

Down by the Station Roberta S. Greenwood, 1996-06-01. In 1933 the demolition of the thriving Los Angeles Chinatown for the construction of Union Station sealed the remains of this intact community 14 feet below the railroad tracks. The planning and construction of the Metro Rail subway system five decades later included efforts to preserve and protect cultural resources in the area detailed in this volume. The assemblage of excavated material objects reflects the import, preparation and service of food, recreation, health practices, the presence of women and children, rubbish disposal practices and degree of participation in local social networks. The unprecedented numbers and densities of artifacts illuminate aspects of lifeways not previously recorded, revealing a rich picture of people and life in nineteenth and early twentieth century Los Angeles. Intensive historical research, oral history and laboratory analyses have been synthesized into a comprehensive reconstruction of a community that was isolated socially, economically and geographically.

Following this approach, attention is paid to introducing international cultural heritage law and its place in international law, generally illicit excavation and the illegal trade in archaeological finds, protection of underwater cultural heritage, the relationship between cultural heritage and the environment, intangible aspects of heritage and their safeguarding, cultural heritage as traditional knowledge and creativity, regional approaches to protection and human rights issues related to cultural heritage. In addition, newly emerging topics and challenges are addressed, including the relationship between cultural heritage and sustainable development and the gender dynamics of cultural heritage. Providing both a perfect introduction to cultural heritage law and deeper reflection on its
