Travels into Print Innes M. Keighren,Charles W. J. Withers,Bill Bell,2015-05-11 In eighteenth and nineteenth century Britain books of travel and exploration were much more than simply the printed experiences of intrepid authors They were works of both artistry and industry products of the complex and often contested relationships between authors and editors publishers and printers These books captivated the reading public and played a vital role in creating new geographical truths In an age of global wonder and of expanding empires there was no publisher more renowned for its travel books than the House of John Murray Drawing on detailed examination of the John Murray Archive of manuscripts images and the firm s correspondence with its many authors a list that included such illustrious explorers and scientists as Charles Darwin and Charles Lyell and literary giants like Jane Austen Lord Byron and Sir Walter Scott *Travels into Print* considers how journeys of exploration became published accounts and how travelers sought to demonstrate the faithfulness of their written testimony and to secure their personal credibility This fascinating study in historical geography and book history takes modern readers on a journey into the nature of exploration the production of authority in published travel narratives and the creation of geographical authorship a journey bound together by the unifying force of a world leading publisher **Travel Narratives in Translation, 1750-1830** Alison Martin,Susan Pickford,2013-05-07 This book examines how non fictional travel accounts were rewritten reshaped and reoriented in translation between 1750 and 1850 a period that saw a sudden surge in the genre s popularity It explores how these translations played a vital role in the transmission and circulation of knowledge about foreign peoples lands and customs in the Enlightenment and Romantic periods The collection makes an important contribution to travel writing studies by looking beyond metaphors of mobility and cultural transfer to focus specifically on what happens to travelogues in translation Chapters range from discussing essential differences between the original and translated text to relations between authors and translators from intra European narratives of Grand Tour travel to scientific voyages round the world and from established male travellers and translators to their historically less visible female counterparts Drawing on European travel writing in English French German Spanish and Portuguese the book charts how travelogues were selected for translation how they were reworked to acquire new aesthetic political or gendered identities and how they sometimes acquired a radically different character and content to meet the needs and expectations of

an emergent international readership The contributors address aesthetic political and gendered aspects of travel writing in translation drawing productively on other disciplines and research areas that encompass aesthetics the history of science literary geography and the history of the book *Travel Narratives, the New Science, and Literary Discourse, 1569-1750* Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative literary discourse and the New Philosophy in the early modern to early eighteenth century historical periods Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire science and the literary discourse of the travel narrative become intrinsically linked Together the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived The worlds in this text are many for no world is monomial from the antipodes to the New World from the heavens to the seas and from fictional worlds to the world which contains and or constructs one s nation and empire All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse Catalogue of the Library of the U. Ricci,2017-09-29 Travel Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social cultural or linguistic groups Whether such contact is the result of tourism seeking exile or relocating abroad the volume's contributors demonstrate how one's identity cultural assumptions and worldview can be brought into question In some cases the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy In other cases the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience otherwise the traveller or tourist will be at risk of becoming a marginalized figure one disconnected from the society that surrounds him This latest volume in the Culture Civilization series features a collection of essays on travel and tourism The essays cover a range of topics from historical travels to modern social identities They discuss ancient travels contemporary travels in Europe Africa and sustainable eco tourism and the politics of tourism Essays also address experiences of Grenada's Spice Island identity and the effects of globalization and migrations on personal identity
