Mixed Heritage in the Family Carolyn Liebler, Miri Song, 2025-05-15 As interracial unions and multiracial people become more common in the United States mixed heritage people have come to be regarded by some as a bellwether of race relations in the country Is the growth of this population a sign that we are now in a post racial era and our racial identities no longer impact our daily lives In *Mixed Heritage in the Family* sociologists Carolyn A Liebler and Miri Song explore how racially mixed people navigate racial boundaries as they choose spouses and raise families Liebler and Song break new ground by being the first to combine and integrate the study of three aspects of life for people of mixed racial heritage identity spouse choice and childrearing This integrated approach reveals how complicated racial identification can be and how it can be expressed in one s choice of partner or in how one raises their children The authors draw on census data and interviews with Asian White Black White and American Indian Alaska Native White mixed people to better understand how their identity choices are related to their choice of spouse and how they racially identify and raise their children Increasingly mixed people in the United States are identifying with multiple races However the authors find that mixed race people are not a monolith and that how and why they identify varies considerably between and within each group They found several common factors that influenced whether mixed race people choose to identify as biracial solely White or solely as a racial minority These factors include the history of the specific minority race in the U S the racial demographics of where they were raised their social and cultural exposure to their White and non White backgrounds their attachment to their racial backgrounds and how they are seen racially by others The way mixed heritage people identify was closely tied to the race of their spouse However having a White spouse did not necessarily mean the mixed race person felt disconnected from their non White heritage White spouses varied in their racial consciousness and their interest in the culture of their mixed race spouse s minority ancestry The spouse s race and the nature of racial overlap between the spouses was also key in the racial upbringing of a mixed heritage person s child In families where the parents share a minority racial heritage couples lean into their shared family race which guides their parenting choices and family life Many mixed heritage parents found it important to foster racial pride in their children and combat negative racial stereotypes Liebler and Song caution against making superficial predictions about the state of race relations in the U S based on an increase in the multiracial population They show that race has not become less salient in the lives of many mixed race people American society is not post racial *Mixed Heritage in the Family* breaks new ground provides compelling insights in its examination of the lives of mixed race people and shows how complicated racial identification can be

Indigenous Audibilities Amanda Minks,2023 In the middle of the twentieth century transnational networks sparked a range of cultural projects focused on collecting Indigenous music and folklore in the Americas Indigenous Audibilities follows the social relations that created these collections in four interconnected case studies linking the U S Mexico Nicaragua and Chile Indigenous collections were embedded in political projects that negotiated issues of cultural diplomacy national canons and heritage The case studies recuperate the traces of marginalized voices in archives paying special attention to women and Indigenous people Despite the dominant agendas of national and international institutions the diverse actors and the multi directional influences often led to unexpected outcomes Author Amanda Minks brings together vivid storytelling and theories of collection voice and recording to challenge the transparency of archives as a historical source The book presents a social historical method of listening reading and thinking beyond the referentiality of archived texts and in the process uncovers neglected genealogies of cultural music research in the Americas
