Strategic Decisions Theoretical and Empirical Findings Kazuhiro Ohnishi, 2015-04-06 This eBook presents recent case studies on firms and their strategy employed in specific scenarios and industries Readers will find in this volume an analysis of oligopolistic industries done by using various economic models These models attempt to explain changes to the competitive environment owing to strategic firm behavior that is on the assumption that firms are able to compete effectively and advantageously against rivals through applying strategic initiatives This eBook investigates the behavior of profit maximizing firms as well as labor managed state owned and joint stock firms Fifteen chapters present empirical or theoretical findings and develop the economic analysis of firm behavior *Register of Educational Research in the United Kingdom, 1992-1995* National Foundation For Educational Research, 1995 This latest volume of the Register of Educational Research in the United Kingdom lists all the major research projects being undertaken in Britain during the latter months of 1992 the whole of 1993 and 1994 and the early months of 1995 Each entry provides names and addresses of the researchers a detailed abstract the source and amount of the grant where applicable the length of the project and details of published material about the research **Robustness and Complex Data Structures** Claudia Becker, Roland Fried, Sonja Kuhnt, 2014-07-08 This Festschrift in honour of Ursula Gather s 60th birthday deals with modern topics in the field of robust statistical methods especially for time series and regression analysis and with statistical methods for complex data structures The individual contributions of leading experts provide a textbook style overview of the topic supplemented by current research results and questions The statistical theory and methods in this volume aim at the analysis of data which deviate from classical stringent model assumptions which contain outlying values and or have a complex structure Written for researchers as well as master and PhD students with a good knowledge of statistics **The British National Bibliography** Arthur James Wells, 2000 *Activities for Teaching Citizenship in Secondary Schools* Patricia Baker, David Turner, 2014-05-12 A resource for teachers wishing to develop citizenship in their teaching activities It provides activities for use in teaching and includes lesson plans photocopiable work sheets and guides to further resources [The History of the University of Oxford: Volume VIII: The Twentieth Century](#) Brian Harrison, Trevor Henry Aston, 1994-04-07 This volume the eighth in *The History of the University of Oxford* shows how one of the world s major universities has responded to the formidable challenges offered by the twentieth century Because Oxford s response has not taken a revolutionary or dramatic form outside observers have not always appreciated the scale of its transformation Here full attention is given to the forces for change the rapid growth in provision for the natural and social sciences the advance of professionalism in scholarship sport and cultural achievement the diffusion of international influences through Rhodes scholars two world wars and the University s mounting research priorities the growing impact of government and of public funding the steady advance of women and the impact made by Oxford s broadened criteria for undergraduate admission The volume also provides valuable background material for the discussion of educational policy In short it presents the reader with a rich cornucopia of insight

into many aspects of British life **Routledge Handbook of the Economics of Knowledge** Cristiano Antonelli, Albert Link, 2014-12-05 The Routledge Handbook of the Economics of Knowledge provides a comprehensive framework to integrate the advancements over the last 20 years in the analysis of technological knowledge as an economic good and in the static and dynamic characteristics of its generation process There is a growing consensus in the field of economics that knowledge technological knowledge in particular is one of the most relevant resources of wealth yet it is one of the most difficult and complex activities to understand or even to conceptualize The economics of knowledge is an emerging field that explores the generation exploitation and dissemination of technological knowledge Technological knowledge cannot any longer be regarded as a homogenous good that stems from standardized generation processes Quite the opposite technological knowledge appears more and more to be a basket of heterogeneous items resources and even experiences All of these sources which are both internal and external to the firm are complementary as is the interplay between a bottom up and top down generation processes In this context the interactions between the public research system private research laboratories and various networks of learning processes within and among firms play a major role in the creation of technological knowledge In this Handbook special attention is given to the relationship among technological knowledge and both upstream scientific knowledge and related downstream resources By addressing the antecedents and consequences of technological knowledge from both an upstream and downstream perspective this Handbook will become an indispensable tool for scholars and practitioners aiming to master the generation and the use of technological knowledge *Medium Sized Firms and Economics Growth* Janez Prašnikar, 2005 The culprit for deficiencies of knowledge about medium sized companies is their frequent inclusion among small companies The authors try to find arguments for a more sensible definition of medium sized company in modern microeconomic theory theory of entrepreneurship and theory of financial markets According to the first one companies grow until they reach the minimum efficient scale On the other hand a company s size is determined by incomplete contractual relationships The second theory argues that medium sized companies have some advantages because a more manageable number of employees and closer ties between them and the entrepreneur may reduce monitoring costs In addition the employees are more willing to invest in formation of specific skills required for their post The third theory claims that due to information asymmetry medium sized firms resort predominantly to internal sources of financing depreciation retained profits while banks relationship banking are more frequently among external sources of finance than capital markets what are medium sized companies dynamic how do they grow national how a national economy to a large extent depends on the efficiency of medium sized companies and international how some medium sized companies acquire characteristics of multinational companies by means of foreign investment **The New International Year Book** ,1958 AI Fairness and Beyond Chris Reed, 2024-08-08 This book proposes a regulatory system for ensuring that AI makes fair decisions No one wants to be the subject of an unfair decision made by an AI and fairness is so important to society that we

are likely to want to regulate to demand it But how This book attempts to answer that question The aim of regulation must be for an AI s decisions to match the human conception of fairness To understand what that is the book proposes a holistic understanding of fairness which tells us what regulation must try to achieve However regulation is not an abstract activity it regulates how humans behave and the humans in question are those who develop and use AI for decision making Thus the book investigates how those humans are attempting to achieve AI fairness It finds that there is a serious mismatch between how technologists conceptualise fairness compared to other humans How can AI regulation bridge this gap Traditional models of regulation cannot solve this problem Fairness is too nuanced too contextual and is ultimately a human emotional response Instead the book proposes to place the responsibility on the AI community to explain and justify their efforts to achieve fairness basing regulatory and legal responses on how well that explanation deals with the risks that particular AI presents and whether the AI operates in accordance with the explanation in use The book concludes by examining how far this regulatory model might be useful for some of the other social problems which AI generates An original and significant contribution to the literature on AI regulation this book is a must read for those working in the areas of law regulation and technology

Forecasting Non-stationary Economic Time Series Michael P. Clements,David F. Hendry,1999 This text on economic forecasting asks why some practices seem to work empirically despite a lack of formal support from theory After reviewing the conventional approach to forecasting it looks at the implications for causal modelling presents forecast errors and delineates sources of failure

Simulation-based Inference in Econometrics Roberto Mariano,Til Schuermann,Melvyn J. Weeks,2000-07-20 This substantial volume has two principal objectives First it provides an overview of the statistical foundations of Simulation based inference This includes the summary and synthesis of the many concepts and results extant in the theoretical literature the different classes of problems and estimators the asymptotic properties of these estimators as well as descriptions of the different simulators in use Second the volume provides empirical and operational examples of SBI methods Often what is missing even in existing applied papers are operational issues Which simulator works best for which problem and why This volume will explicitly address the important numerical and computational issues in SBI which are not covered comprehensively in the existing literature Examples of such issues are comparisons with existing tractable methods number of replications needed for robust results choice of instruments simulation noise and bias as well as efficiency loss in practice
