Nukes In Space The Rainbow Bombs:

Burning the Sky Mark Wolverton, 2018-11-27 The unbelievable true story of an American Cold War scheme to detonate nuclear bombs in space is revealed in this military history exposé. The summer of 1958 was a nerve racking time. The Soviet Union's launch of Sputnik drew America into a game of nuclear one upmanship. Tensions escalated between the two superpowers over their respective nuclear weapons reserves both sides desperate for a solution to the imminent threat of massive destruction. In America an outlandish yet ingenious idea was raised by the eccentric physicist Nicholas Christofilos launching atomic bombs into outer space to fry incoming Soviet ICBMs with an artificial radiation belt. Known as Project Argus this secret plan was the riskiest scientific experiment in history. In *Burning the Sky* Mark Wolverton draws on recently declassified sources to tell this incredible unknown story. *Burning the Sky* chronicles Christofilos's unconventional idea from its inception to execution when the so called mad scientist persuaded the military to use the entire Earth's atmosphere as a laboratory. A meticulously researched tale that reads like a sci fi thriller *Burning the Sky* will intrigue any lover of scientific or military history.

Readers will find expert analysis of such crucial recent events as Libya's disarmament, the failed WMD search in Iraq, A.Q. Art After the Bomb Darrell D. Davisson, 2008 This book is requisite reading material for any person claiming to be an educated and informed member of the global community. Our understanding in the West of the Eastern cultures, specially the different cultures involving the Muslims is alarmingly low. The book strives to offer a view from the ground, a keyhole perspective that offers the readers a close and personal peek into some of the ethical underpinnings and the philosophical guiding parameters that inform the Muslim and the Eastern mind. There are over 1.3 billion Muslims in the world. It would be a serious intellectual fallacy to assume that they are all homogenous or to be more preposterous assume they are all terrorists. It is extremely tragic that it took the Iranian hostage crisis to teach us about Shia Islam and 9/11 to teach us about Wahabi Islam. Properly acquired knowledge, not just what we learn from the media, will allow us to be anticipatory and rational rather than being reactive and emotional. For the Muslim reader, specially the children and the youth, the book strives to offer a deeper understanding of Islam beyond the boundaries.
