Numerology Edward Gondwe, 2017-05-22 Numerology The Magical Universe of Number and What It Means For Character and Destiny is a fun book that draws upon the fact that numerology is an intuitive science based on the principles of the universe It is based on the truth that numbers are facts found naturally and thus embody functional truths which can describe humanity with ease The preternatural element of number comes before the arbitrary that overlays our civilization and thus describes the power of this book The book shows that symbolism is powerful and has allowed us to capture the archetypal realities of number in drawn symbols coming from deep human psychism from very gifted people in our past And it shows that the number symbolism extends to the alphabet which too is based on number This book has presented numerology with the author focusing directly on the functional realities of numbers and how they describe people and their karma and what all of this means for our race This is an intuitively driven account of numerology and proceeds from extrasensory knowledge of the meaning of the numbers and how it relates to karma and soul characters and descriptions The author is in touch with higher realities so as to make a numerology book that comes from a very high place drawing from functional realities of the universe The book is fun and is meant to show that humanity already has a treasure trove of knowledge about navigating this world and is ready to embrace ever higher forms of evolution and learning Included in this book are historical numerology cases of famous personalities
